IV. Revisions to the List of Thermal Protection Systems Excepted From Test Verification

Given that this list was last published in the **Federal Register** on May 13, 1993, (Notice No. 93–12; 58 FR 28436), PHMSA and FRA anticipate that changes have inevitably occurred since its most recent publication—including the potential that companies on the list have moved, changed tradenames, closed, merged with other companies, or have been purchased by other companies. Therefore, PHMSA is providing stakeholders with the opportunity to comment on and request revisions to the current list of thermal protection systems excepted from test verification. This notice is not a solicitation for systems not identified on the list. Any proposed revisions submitted in response to this notice must meet the criteria for revision in this section.

For revisions to entries on the list:

- Persons requesting only a tradename change must submit information that the revision or change is not a new thermal protection system. Persons requesting further changes must submit a certification statement or test data and technical specifications demonstrating that the physical properties of the system have not changed. (See **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT**.)

PHMSA and FRA will evaluate the revisions and comments received in response to this notice, including review of certification statements, test data, and technical specifications demonstrating the system is compliance with appendix B to 49 CFR part 179. Once all comments have been evaluated, PHMSA will publish a follow-up notice in the **Federal Register** to provide the most up-to-date list of thermal protection systems excepted from test verification, including any revised entries. PHMSA will continue to maintain the list of thermal protection systems in the PHMSA Records Center and will also post a copy of the list to our website at <http://www.phmsa.dot.gov>, where future additions and revisions will be published.
