Notes:

¹ This table represents the maximum additional burden if adult respondents, for the discretionary services programs including ATR, provide three sets of responses/data and if CSAT adolescent respondents provide four sets of responses/data.

² Added burden proportion is an adjustment reflecting customary and usual business practices programs engage in (e.g., they already collect the data items).

³ Estimate based on \$5.15 for program staff, \$15 for IT staff, and \$25 for more senior IT staff for ATR uploads.

⁴ Screening, Brief Intervention, Treatment and Referral (SBIRT) grant program:

* 150,618 Screening Only (SO) respondents complete section A of the GPRA instrument, all of these items are asked during a customary and usual intake process resulting in zero burden; and

* 27,679 Brief Intervention (BI) respondents complete sections A & B of the GPRA instrument, all of these items are asked during a customary and usual intake process resulting in zero burden; and

* 9,200 Brief Treatment (BT) & Referral to Treatment (RT) respondents complete all sections of the GPRA instrument.

⁵ Data Extract by Grants: Grant burden for capturing customary and usual data.

⁶ Upload: 5 of the 7 SBIRT grants upload data; the other 2 grants conduct direct data entry.

⁷ Upload: All 24 ATR grants upload data.

⁸ 1 hour per 6,000 records.

The estimates in this table reflect the maximum annual burden for currently funded discretionary services programs. The number of clients/participants served in following years is estimated to be the same assuming level funding of the discretionary programs, resulting in the same annual burden estimate for those years.
