Description of the need for the information and proposed use: The Department of Housing and Urban Development (HUD), under contract to Abt Associates Inc. and its subcontractors, Fairview Industries and Smart Data Strategies, is conducting a project to collect existing parcel data from 127 pre-selected counties and 27 corresponding States to construct a standardized parcel database for HUD's usage. The main objective of the project is to provide HUD with reliable and currently collected information on housing market and neighborhood conditions in counties and States identified by HUD as recipients of HUD funding so that HUD can perform three types of activities. First, this database will give HUD an ability to track home sales, foreclosures and tax assessments and also respond efficiently to economic and natural disasters that may occur in the near future. Second, the information collected by this project is intended to support future evaluations of HUD programs such as the Neighborhood Stabilization Program (NSP), the HOME Investment Partnership Program, and the Disaster Recovery Assistance program. Third, the process of data collection will be used to assess the feasibility of constructing an ongoing parcel database that could be extended to have a national coverage and also be available to the public as aggregates by geography.
