

identify the strengths and weaknesses of the NPIN Web site, and other products and services. This process also ensures collecting data using a consistent format and complies with requirements under the Public Health Service Act, Executive Order 12862, and GPRA. Ultimately, the data collected will enable the NPIN team to provide the highest quality products and services to NPIN users.

Without this information collection, CDC will be hampered in successfully carrying out its mission of providing quality products and services to populations served. Failure to continue with the data collection effort would compromise efforts to meet the legislative requirement of being as responsive as possible to the public who consistently seek information about the

prevention and treatment of HIV/AIDS, STDS, TB, and viral hepatitis. Moreover, it would diminish NPIN's value to the public in terms of usability and credibility as a comprehensive Federal information and education resource. There is no cost to respondents other than their time.
