#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The USPTO Quality Survey is designed to measure opinions about the services the USPTO provides to its patent application customers. This information collection contains a survey that the USPTO uses to gauge customer satisfaction with patent examination quality.

The results from this voluntary survey will assist the USPTO in guiding improvements and enhancements in the future. The USPTO conducts the Patents External Quality Survey as part of its quality improvement efforts. This survey narrows the focus of customer satisfaction to examination quality and uses a longitudinal, rotating panel design to assess changes in customer perceptions and to identify key areas for examiner training and opportunities for improvement. The USPTO uses this survey to identify problems with examination quality and works to resolve these issues in a timely manner.

The USPTO surveys patent agents, attorneys, and other individuals from large domestic corporations (including those with 500+ employees), small and medium-sized businesses, independent inventors, and universities and other non-profit research organizations. This survey does not include foreign entities.

The random sample used in this survey is drawn from One Patent Service Gateway. The sample population is drawn from the top filing firms, which are entities that have filed more than five patent applications in a 12-month period. This ongoing survey is generally conducted twice a year. The USPTO uses a rotating panel design where participants take the survey twice in back-to-back survey periods (waves). Half the participants in each survey period are new and complete the survey for the first time and half return to complete the same survey for a second time. This design allows a precise measurement of changes in customer experience over time. The rotating panels and their impact on respondents are described in more detail in the table below.

TABLE 1—THE ROTATING PANEL

Panel 1 .....	Holdover panel from the previous year, respondents are surveyed once in Wave 1.
Panel 2 .....	Wave 1 and Wave 2 in the current year, respondents are surveyed in both waves.
Panel 3 .....	New panel in the current year, respondents are only surveyed once in Wave 2.

The Patents External Quality Survey is primarily a web-based survey, although respondents can also complete the survey via paper and mail if they prefer. Both versions are identical. The USPTO sends potential respondents either an email or mailed pre-survey letter, depending on the respondent's preferred method of contact. At the beginning of each survey period, the USPTO provides respondents with instructions for accessing and completing the survey electronically. After a specified response period, the USPTO sends a survey packet to all sample members who have not yet submitted a response. The packet contains the questionnaire, a separate cover letter, and a postage-paid pre-

addressed return envelope. Sampled members receiving a paper survey can still complete the survey electronically if they prefer. The USPTO also uses reminder/thank-you postcards and telephone calls to encourage a response from sample members.

##### II. Method of Collection

The survey may be submitted electronically or in paper form via mail.
