

videography, photo-identification surveys, and to collect sloughed skin around the waters of Hawaii, primarily the Kona Coast and Maui County near-Lanai waters, Kalohi Channel, and Pailolo Channel. Research would also occur in Southeast Alaska and Kachemak Bay area when platforms become available. The permit is valid until November 15, 2016.

An environmental assessment (EA) was prepared analyzing the effects of the permitted activities on the human environment in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Based on the analyses in the EA, NMFS determined that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. That determination is documented in a Finding of No Significant Impact (FONSI), signed on November 8, 2011.

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
