

gillnet fishery. Since the PLCA was established to reduce the take of endangered leatherback sea turtles in this fishery, other mitigation measures may be considered to compensate for any additional fishing opportunity. Specifically, the HMSMT will consider a regulatory limit on the annual number of incidental take interactions allowed in the fishery. This regulatory approach has been used successfully in the Hawaii-based shallow-set pelagic longline fishery to limit takes of leatherback and loggerhead sea turtles.

The HMSMT will also begin work on the next Stock Assessment and Fishery Evaluation document, which is prepared annually, summarizing information from the previous year. Informational topics may also be discussed, time permitting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820-2280 at least 5 days prior to the meeting date.
