

j. *Deadline for filing comments, recommendations, terms and conditions, and prescriptions:* 60 days from the issuance date of this notice.

All documents (original and eight copies) should be filed with: Magalie R. Salas Secretary, Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

Comments, recommendations, terms and conditions, and prescriptions may be filed electronically via the Internet in lieu of paper. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site (<http://www.ferc.gov>) under the "e-Filing" link.

k. *Status of environmental analysis:* This application has been accepted for filing and is now ready for environmental analysis. At this time we do not anticipate the need for preparing a draft EA. We intend to prepare a supplement to the environmental document issued in 1992. The supplemental EA will include our recommendations for operating procedures and environmental enhancement measures that should be part of any new license issued by the Commission. Recipients will have 45 days to provide the Commission with any comments on that document. All comments on the EA, filed with the Commission, will be considered in the licensing decision. However, should substantive comments requiring re-analysis be received on the NEPA document, we would consider preparing a subsequent NEPA document before the licensing decision.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those owners or operators of facilities that wish to voluntarily clean up contamination of their site.

Title: "Hazardous Remediation Waste Management Requirements (HWIR-

Media)" OMB Control No. 2050-0161; EPA ICR No. 1775.03 expiring 06/30/02.

Abstract: All information collection activities required by this rule are authorized by sections 3004 and 3005 of the Solid Waste Disposal Act of 1970, as amended by the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (SHWA), 42 U.S.C. 6912(a), 6921, 6924, 6925, 6926, and 6927. EPA believes the information collection for this rule is necessary to balance streamlined regulations of remediation wastes with the Agency's responsibility to protect human health and the environment. The respondents are primarily owners or operators of facilities that wish to voluntarily clean up contamination of their site.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: EPA believes that the previous ICR (ICR Number 1775.02) overestimated the number of respondents reading the regulations, since ICRs need only burden respondents for reading the regulations in association with the collection of information. Given this, the current ICR assumes that 176 respondents will perform the paperwork requirements and hence will read the regulations. This is consistent with all other ICRs in the Office of Solid Waste. For hazardous remediation waste management sites that wish to utilize the flexibility provided by the optional requirements of the HWIR-media Rule, the estimated

total annual hour burden for this information collection is 4,959 hours, which is about 29,000 hours lower than the previous ICR's burden estimate. The estimated total annual cost burden for this information collection is \$334,886, which includes labor, capital, operations and maintenance, and purchased service costs. The total burden over the three year period of this ICR is estimated to be 14,877 hours and \$1,004,658.

EPA estimates that, on average, 30 sites will be subject to the requirements in 40 CFR 264.1(j) and part 270, subpart H (i.e., the requirements for sites with RAPs) over the three-year period of this ICR. Note that this ICR addresses only non-permitted sites under 40 CFR 264.1(j) and part 270, subpart H. A site may conduct cleanup through a RAP, permit, or other specified mechanism. Permitted facilities would obtain a RAP by modifying their permit. These activities are already addressed in "Part B Permit Application, Permit Modifications, and Special Permits," ICR Number 1573. Therefore, this ICR addresses only non-permitted sites under the RAP requirements.

EPA also estimated the number of owners/operators of hazardous remediation waste management sites subject to the 40 CFR 264.554 requirements for staging piles. Based on the Biennial Reporting System (BRS) data, EPA estimates that, currently, there are 87 existing hazardous remediation waste management sites with staging piles. Additionally, EPA estimates that, each year, 59 owners/operators of non-permitted hazardous remediation waste management sites will seek a new staging pile designation.

EPA estimates that 176 owners/operators of hazardous remediation waste management sites (i.e., $30 + 87 + 59 = 176$) will be subject to the requirements in this ICR and will, therefore, read the regulations each year.

For owners/operators of hazardous remediation waste management sites subject to the 40 CFR 264.1(j) and part 270, subpart H requirements, the reporting burden is estimated to be 27.33 hours per respondent per year. This hourly burden includes time for preparing and submitting a RAP application, information to modify a RAP, and information to transfer a RAP. The recordkeeping burden is estimated to be 42.13 hours per respondent per year. This hourly burden includes time for reading the regulations and maintaining documentation (e.g., waste analyses results, contingency and emergency plan, file of RAP documents) on site.

For owners/operators of hazardous remediation waste management sites subject to the 40 CFR 264.554 requirements for staging piles, the reporting burden is estimated to be 7.08 hours per year per respondent. This hourly burden includes time for preparing and submitting information for a staging pile designation and documentation supporting a staging pile extension. The recordkeeping burden is estimated to be 12.61 hours per respondent per year. This hourly burden includes time for reading the regulations and complying with the recordkeeping requirements in section 264.554(d)(1)(iii).

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: March 11, 2002.

Elizabeth Cotsworth,

Director, Office of Solid Waste.
