Proposed Project: SF-424 Mandatory—Revision-OMB No. 4040-0002—Grants.gov.

Abstract: This collection is the government-wide form used for mandatory grant programs.

Proposed revision to the form includes the addition of a data block that will collect the

- I11“Descriptive Title of Applicant’s Project.” The data field labeled

“County” will be revised to read “County/Parish.” The instructions are also being revised to incorporate the new descriptive title block and also, revisions to the instructions for areas affected by funding and the congressional district. Changes to the instructions will increase data quality and clarity for the collection.

Adding an additional data block is necessary to comply with the requirements of the Federal Funding Accountability and Transparency Act (FFATA). FFATA was signed into law on September 26, 2006 (Pub. L. 109-282). The legislation requires the Office of Management and Budget (OMB) to establish a publicly available, online database containing information about entities that are awarded federal grants, loans, and contracts. The revised form will assist agencies in collecting the required data elements for the database through the SF-424 applications. This form will be utilized on occasion by up to 26 Federal grant making agencies with mandatory grant programs. We are requesting a 2-year clearance of this form. The affected public includes, Federal, State, Local or Tribal governments, business or other for profit, and not for profit institutions.

Proposed Project: SF-424 Research & Related (R&R) Form—Revision—OMB No. 4040-0001—Grants.Gov.

Abstract: The SF-424 (R&R) is the government-wide data set for research grant applications. The data set provides information to assist Federal program staff and grants officials in assessing the adequacy of applicant's proposals to accomplish project objectives and determine whether grant applications reflect program needs.

Agencies will not be required to collect all of the information in the

proposed data set. The agency will identify the data that must be provided by applicants through instructions that will accompany the application package. The proposed data set incorporates proposed revisions adopted by the cross-agency R&R working group. This working group established the original proposed data set (4040-0001) in 2004. The form instructions will also be revised.

We propose two major changes in our revision request. The first major change is to remove the Project/Performance Site Location(s) form from the collection. This form will be revised and included in a separate OMB-approved collection. The Project/Performance Site Locations(s) forms will be required with all SF-424 form families with the exception of the SF-424 Individual form. The second major change is to incorporate into this collection the Small Business Innovation Research (SBIR) / Small Business Technology Transfer (STTR) Information form (OMB Number 0925-0001). The existing SBIR/STTR Information form (OMB No. 0925-0001) will be discontinued once this R&R collection is renewed. We are requesting a 3-year extension of the revised form. The affected public may include Federal, State, Local, or Tribal.
