

petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of the 30-day hearing period, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective,

notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to General Council, Tennessee Valley Authority, ET 11H, 400 West Summit Hill Drive, Knoxville, Tennessee, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated July 13, 2000, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and accessible electronically through the ADAMS Public Electronic Reading Room link at the NRC Web site (<http://www.nrc.gov>).

Dated at Rockville, Maryland, this 14th day of July 2000.

For the Nuclear Regulatory Commission.

Ronald W. Hernan,

Senior Project Manager, Section 2, Project Directorate II, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

Consolidated Guidance about Materials Licenses: Guidance about Administrative Licensing Procedures

AGENCY: U.S. Nuclear Regulatory
Commission (NRC).

ACTION: Notice of Availability and
Request for Comments.

SUMMARY: The NRC is announcing the
availability of, and requesting comments
on, draft NUREG-1556, Volume 20,
"Consolidated Guidance about Materials
Licenses: Guidance about
Administrative Licensing Procedures,"
dated July 2000.

The NRC is using Business Process
Redesign techniques to redesign its
materials licensing process, as described
in NUREG-1539, "Methodology and
Findings of the NRC's Materials
Licensing Process Redesign." A critical
element of the new process is
consolidating and updating numerous
guidance documents into a NUREG-
series of reports. This draft NUREG
report is the 20th guidance document
developed for the new process.

This guidance is intended for use by
the NRC staff, and will also be available
to Agreement States, applicants, and
licensees. This document combines and
updates the guidance for NRC license
reviewers and licensing assistants
previously found in the documents
listed in Appendix A of the NUREG.
When published in final form, NRC
licensing staff will use these
administrative procedures to process
license applications and prepare
licenses. Note that this document is
strictly for public comment and is not
for use in preparing or reviewing license
applications until it is published in final
form. It is being distributed for
comments to encourage public
participation in its development.

DATES: The comment period ends
October 3, 2000. Comments received
after that time will be considered if
practicable.

ADDRESSES: Submit written comments
to: Chief, Rules and Directives Branch,
Division of Administrative Services,
Office of Administration, U. S. Nuclear
Regulatory Commission, Washington,
D.C. 20555-0001. Hand-deliver

comments to 11545 Rockville Pike,
Rockville, Maryland, between 7:15 a.m.
and 4:30 p.m. on Federal workdays.
Comments may also be submitted
through the Internet by addressing
electronic mail to dlm1@nrc.gov.

Those considering public comment
may request a free single copy of draft
NUREG-1556, Volume 20, by writing to
the U.S. Nuclear Regulatory
Commission, ATTN: Mrs. Carrie Brown,
Mail Stop TWFN 9-C24, Washington,
D.C. 20555-0001. Alternatively, submit
requests through the Internet by
addressing electronic mail to
cxb@nrc.gov. A copy of draft NUREG-
1556, Volume 20, is also available for
inspection and/or copying for a fee in
the NRC Public Document Room, 2120
L Street, NW. (Lower Level),
Washington, D.C. 20555-0001.

The Presidential Memorandum dated
June 1, 1998, entitled, "Plain Language
in Government Writing," directed that
the Federal government's writing be in
plain language. The NRC requests
comments on this licensing guidance
NUREG specifically with respect to the
clarity and effectiveness of the language
used. Comments should be sent to the
address listed above.

NUCLEAR REGULATORY COMMISSION

Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Well Logging, Tracer, and Field Flood Study Licenses

AGENCY: Nuclear Regulatory
Commission (NRC).

ACTION: Notice of availability.

SUMMARY: The Nuclear Regulatory
Commission (NRC) is announcing the
availability of the final NUREG-1556,
Volume 14, "Consolidated Guidance
about Materials Licenses: Program-
Specific Guidance about Well Logging,
Tracer, and Field Flood Study
Licenses," dated June 2000. This final
NUREG report is the 14th program-
specific guidance document developed
to support an improved material
licensing process. NRC is using
Business Process Redesign (BPR)
techniques to redesign its material
licensing process, as described in
NUREG-1539, "Methodology and
Findings of the NRC's Materials
Licensing Process Redesign." A critical
element of the new process is
consolidating and updating numerous
guidance documents into a NUREG-
series of reports.

This final guide has been developed
in parallel with the final revision of 10
CFR Part 39, "Energy Compensation
Sources for Well Logging and Other
Regulatory Clarifications," published as
a Final Rule on April 17, 2000 (65 FR
20337). It is intended for use by
applicants, licensees, NRC license
reviewers, and other NRC personnel.

This final report takes a more risk-
informed, performance-based approach
to licensing of well logging, tracer, and
field flood study operations, and
reduces the information (amount and
level of detail) needed to support an
application to use these devices.

A free single copy of final NUREG-
1556, Volume 14, may be requested by
writing to the U.S. Nuclear Regulatory
Commission, ATTN: Mrs. Carrie Brown,
Mail Stop TWFN 9-C24, Washington,
DC 20555-0001. Alternatively, submit
requests through the Internet by
addressing electronic mail to
cxb@nrc.gov. A copy of final NUREG-
1556, Volume 14, is also available for
inspection and/or copying for a fee in
the NRC Public Document Room, 2120
L Street, NW. (Lower Level),
Washington, DC 20555-0001.
