SUPPLEMENTARY INFORMATION: The three draft guidance documents are: (a) *Contamination Monitoring Guidance for Portable Instruments Used for Radiological Emergency Response* (10 pages); (b) *Background Information on Contamination Monitoring Guidance for Portable Instruments Used for Radiological Emergency Response* (55 pages); and (c) *Statements of Consideration for Contamination Monitoring Guidance for Portable Instruments Used for Radiological Emergency Response* (7 pages).

We developed this guidance in response to a request from the Conference of Radiation Control Program Directors (CRCPD). The CRCPD asked us to develop guidance for portable instruments that afford protection to the public equivalent to the portal monitor standard that we established and published in the **Federal Register**, 60 FR 15290-15291, March 23, 1995.

We worked through the Federal Radiological Preparedness Coordinating Committee (FRPCC) and its Offsite Emergency Instrumentation Subcommittee to develop and coordinate the portal monitor standard and the guidance for portable instruments. We chair the FRPCC and with the Nuclear Regulatory Commission (NRC) co-chair the Offsite Emergency Instrumentation Subcommittee, which includes members from several Federal agencies. Members of the CRCPD's E-6 Committee (composed of State radiological health officials) participate in meetings of this Subcommittee as ex-officio members. We also made the draft guidance available to FEMA Regional staff and CRCPD constituents in all 50 States for review and comment. We
