Recognizing that streams are highly complex systems, space is provided to include additional indicators that may be particular to certain regions or channel types. The datasheet and field procedure guide users through the step-by-step process of identifying and documenting the OHWM in a more consistent, reliable, and repeatable manner. The OHWM form organizes the information into a logical and consistent format, and makes use of checkboxes and data entry prompts to ensure all of the necessary information to document the OHWM is provided as necessary in a manner that minimizes data entry for respondents.
