**SUPPLEMENTARY INFORMATION:** The Chemical Sector-Specific Agency, within the DHS NPPD/SSA EMO, provides an on-line voluntary training program to improve security in the chemical industry sector. Information is automatically collected in a computer database as a result of individuals engaging in the training. Explicit reporting or recordkeeping is not required. The training is designed for the general chemical facility employee. U.S. chemical industry direct employment is about 850,000 (2009 per the American Chemistry Council); approximately 400,000 employees are estimated as potential participants. Estimated duration in the first year to complete the registration, training, and survey is 60 minutes, and less if individuals take refresher training in succeeding years. Minimal participation data is collected as trainees complete the online exercises. Upon completion,

<sup>2</sup> FDA has verified the Web site address, but FDA is not responsible for any subsequent changes to the Web site after this document publishes in the **Federal Register**.

a Certificate of Completion is generated at the trainee's computer work station, printed, and optionally e-mailed to a facility supervisor. DHS will monitor program participation, success in training, and basic distribution variables submitted upon registration. Training information and survey responses gathered will be used for program review purposes only. Personally identifiable information, such as the trainee's name when optionally entered on the printable certificate, will not be stored in the system. In addition, e-mail addresses and other contact information are not requested to complete the training. To protect privacy, users will be asked to create a generic user ID, password, and password retrieval question and answer.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
