2, 2024, to be considered by the Board. The DFO will review all timely submitted written comments or statements with the Board Chair and ensure the comments are provided to all members of the Board before the meeting. Written comments or statements received after this date may not be provided to the Board until its next scheduled meeting. Please note that all submitted comments and statements will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the Board's website.

Dated: January 12, 2024.

## Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001-FR-P

#### **DEPARTMENT OF ENERGY**

#### National Nuclear Security Administration

Notice of Availability of Final Environmental Impact Statement for the Surplus Plutonium Disposition Program

**AGENCY:** National Nuclear Security Administration, Department of Energy. **ACTION:** Notice of availability.

SUMMARY: The National Nuclear Security Administration (NNSA), a semi-autonomous agency within the Department of Energy (DOE), announces the availability of the Final Environmental Impact Statement for the Surplus Plutonium Disposition Program (SPDP EIS) (DOE/EIS-0549) in compliance with the National Environmental Policy Act of 1969 (NEPA). NNSA prepared the Final SPDP EIS to evaluate the potential environmental impacts of dispositioning 34 metric tons (MT) of surplus plutonium.

**DATES:** NNSA will not issue a Record of Decision (ROD) on the proposal for a minimum of 30 days after the date that the U.S. Environmental Protection Agency (EPA) publishes its Notice of Availability (NOA) in the **Federal Register**.

ADDRESSES: Requests for additional information related to the EIS should be sent by email to SPDP-EIS@ nnsa.doe.gov or to Ms. Maxcine Maxted, NEPA Document Manager, National Nuclear Security Administration, Office of Material Management and

Minimization, P.O. Box A, Bldg. 730–2B, Rm. 328, Aiken, SC 29802.

The SPDP EIS is available on the internet at: https://www.energy.gov/nnsa/nnsa-nepa-reading-room and https://www.energy.gov/nepa/doeeis-0549-surplus-plutonium-disposition-program.

FOR FURTHER INFORMATION CONTACT: For further information about this notice, please contact Ms. Maxcine Maxted, NEPA Document Manager, National Nuclear Security Administration, Office of Material Management and Minimization, P.O. Box A, Bldg. 730–2B, Rm. 328, Aiken, SC 29802; phone: (803) 952–7434; email: SPDP-EIS@nnsa.doe.gov.

#### SUPPLEMENTARY INFORMATION:

#### **Background**

NNSA prepared the SPDP EIS pursuant to NEPA (Title 42 U.S.C. 4321 et seq.), the Council on Environmental Quality's NEPA regulations (40 CFR parts 1500–1508), and the DOE NEPA implementing procedures (10 CFR part 1021). NNSA's previous NEPA reviews and decisions regarding the disposition of surplus plutonium are summarized in Section 1.1 of the SPDP EIS. The following paragraphs describe recent developments relevant to the scope of the SPDP EIS.

In 2015, NNSA completed the Surplus Plutonium Disposition Supplemental Environmental Impact Statement (SPD Supplemental EIS) (DOE/EIS-0283-S2). In the SPD Supplemental EIS, NNSA evaluated the environmental impacts of alternatives for dispositioning 13.1 MT of surplus plutonium (7.1 MT of pit and 6 MT of non-pit) for which a disposition path had not been assigned. The alternatives evaluated in the 2015 SPD Supplemental EIS included the Mixed Oxide (MOX) Fuel Alternative, the Waste Isolation Pilot Plant (WIPP) Alternative, and two variations of waste immobilization. In addition, NNSA evaluated four options for pit disassembly and conversion (pit disassembly and conversion is equivalent to pit disassembly and processing [PDP] as used in this Notice and the SPDP EIS) using facilities at the Savannah River Site (SRS) and Los Alamos National Laboratory (LANL). In 2015, NNSA announced that its preferred alternative for disposition of the six MT of non-pit surplus plutonium evaluated in the SPD Supplemental EIS was to prepare the non-pit surplus plutonium for eventual disposal at the WIPP facility in Carlsbad, New Mexico (80 FR 80348, December 24, 2015). In a 2016 ROD, NNSA announced a decision to disposition the six MT of non-pit

surplus plutonium by downblending it with an adulterant (downblending is a process equivalent to dilution in the dilute and dispose strategy as used in the SPDP EIS), packaging it as defense-related contact-handled transuranic (CH–TRU) waste, and shipping it to the WIPP facility for disposal (81 FR 19588). In the 2016 ROD, NNSA did not make a decision about the disposition of the 7.1 MT of pit plutonium or about the various options for pit disassembly and conversion that were analyzed in the 2015 SPD Supplemental EIS.

In 2016, NNSA, partnering with the U.S. Army Corps of Engineers, developed an independent cost estimate for the MOX Fuel Fabrication Facility (MFFF) project and concluded that the cost of the project, upon completion of construction, would be approximately \$17 billion and construction would not be complete until 2048. Congress directed NNSA to prepare a lifecycle cost estimate for disposal of surplus plutonium using the same approach announced for the six MT, now referred to as the dilute and dispose strategy. The completed cost estimate indicated that the estimate-to-complete lifecycle cost of the dilute and dispose strategy would be substantially lower than the cost to complete the MOX project. In response, the Secretary of Energy halted construction of the MOX fuel project in May 2018 by waiving the requirement to use funds for construction and support activities for the MFFF per the National Defense Authorization Act. In a letter dated May 10, 2018, the Secretary of Energy certified that "the remaining lifecycle cost for the dilute and dispose strategy will be less than approximately half of the estimated remaining lifecycle cost of the MOX fuel program." On October 10, 2018, NNSA issued a notice terminating the contract for construction of MFFF. On February 8, 2019, the U.S. Nuclear Regulatory Commission (NRC) terminated the construction license for MFFF (NRC 2019). NNSA is preparing this SPDP EIS to evaluate alternatives for disposition of the 34 MT of surplus plutonium previously designated for disposition using the MOX fuel program that no longer has a disposition path.

In 2020, NNSA prepared a
Supplement Analysis (SA) based on the
analysis presented in the 2015 SPD
Supplemental EIS. NNSA determined
that disposition of 7.1 MT of non-pit
surplus plutonium was not a substantial
change in the action analyzed in the
2015 SPD Supplemental EIS to
disposition 7.1 MT of pit plutonium via
the WIPP Alternative and that the
environmental impacts had been
sufficiently analyzed. NNSA
subsequently issued an Amended ROD

(AROD) to include preparation of an additional 7.1 MT of non-pit surplus plutonium for disposal as defense-related CH–TRU waste at the WIPP facility (85 FR 53350, August 28, 2020). In the same 2020 AROD, NNSA also decided that non-pit metal processing (NPMP) may be performed at either LANL or SRS. The SA and AROD are available online at https://www.energy.gov/nnsa/nnsa-nepa-reading-room.

The 7.1 MT of non-pit surplus plutonium referred to in the 2020 AROD is part of the 34 MT of surplus plutonium that NNSA had decided to disposition by fabricating it into MOX fuel for use in commercial reactors. The disposition of that 34 MT is the subject of this SPDP EIS.

### Purpose and Need for Agency Action

Since the end of the Cold War in the early 1990s and the Presidential declarations of surplus fissile materials, DOE has been charged with the disposition of surplus plutonium.

NNSA's purpose and need for action is to safely and securely disposition plutonium that is surplus to the Nation's defense needs so that it is not readily usable in nuclear weapons. NNSA needs to disposition 34 MT of surplus plutonium in a safe and secure manner and in a reasonable time frame at a cost consistent with NNSA priorities and fiscal realities. To achieve this, NNSA must use mature methods and proven technologies that are based on processes requiring minimal research and engineering development.

## **Proposed Action and Alternatives**

Both the Preferred Alternative and the No Action Alternative in the SPDP EIS use the dilute and dispose strategy, and both address up to 7.1 MT of non-pit surplus plutonium that NNSA previously decided to dispose of using the dilute and dispose strategy (85 FR 53350). The dilute and dispose strategy includes processing surplus plutonium to plutonium oxide, diluting it with an adulterant to inhibit plutonium recovery, and disposing the resulting defense-related CH–TRU waste at the WIPP facility.

## **Preferred Alternative**

NNSA's Preferred Alternative is to use the dilute and dispose strategy for 34 MT of surplus plutonium comprised of both pit and non-pit surplus plutonium. The exact amounts of pit and non-pit forms of plutonium that compose the 34 MT are safeguarded, so they cannot be delineated further. Therefore, to bound the impacts, the analysis in the SPDP EIS evaluates the impacts of

dispositioning 34 MT of surplus plutonium in pit form and the impacts of dispositioning 7.1 MT of non-pit surplus plutonium. The activities that are part of the Preferred Alternative would occur at five DOE sites—the Pantex Plant (Pantex) in Texas, LANL in New Mexico, SRS in South Carolina, the Y–12 National Security Complex (Y–12) in Tennessee, and the WIPP facility in New Mexico. NNSA has developed four sub-alternatives for the Preferred Alternative based on the location of activities.

## Base Approach Sub-Alternative

Under the Base Approach Sub-Alternative, NNSA analyzes the impacts of shipping 34 MT of surplus pit plutonium from Pantex to LANL and disassembling and processing (i.e., PDP) of the 34 MT of surplus pit plutonium at LANL with subsequent shipment of the decontaminated and oxidized highly enriched uranium (HEU) to Y-12. NNSA also analyzes the impacts of processing 7.1 MT of non-pit surplus plutonium at LANL, using some of the same capabilities as PDP. This subalternative would rely on expanding existing capabilities at LANL in the Plutonium Facility (PF-4) for PDP and modifying or building additional support facilities. The resulting plutonium oxide from the surplus pit and non-pit surplus plutonium would be shipped to K-Area at SRS, where it would be diluted, characterized, and packaged for shipment to and disposal at the WIPP facility.

## SRS NPMP Sub-Alternative

The SRS NPMP Sub-Alternative is similar to the Base Approach Sub-Alternative. NNSA analyzes the impacts of shipping 34 MT of surplus pit plutonium from Pantex to LANL and PDP of the 34 MT of surplus pit plutonium at LANL. The decontaminated and oxidized HEU would then be shipped to Y–12. This sub-alternative would rely on NNSA expanding existing capabilities at LANL in PF-4 for PDP and modifying or building additional support facilities. Plutonium oxide resulting from PDP would be shipped to SRS (K-Area). Unlike the Base Approach Sub-Alternative, under this sub-alternative, NNSA does not analyze NPMP at LANL. Instead, processing of 7.1 MT of non-pit surplus plutonium would occur in the SRS K-Area either in Building 105-K or in a modular system adjacent to the building. Under this sub-alternative, NNSA considers the impacts of dilution and characterization and packaging (C&P) of the diluted plutonium oxide as defense-related CH-TRU waste in SRS's

K-Area for shipment to and disposal at the WIPP facility.

#### All LANL Sub-Alternative

Under the All LANL Sub-Alternative, NNSA would use only capabilities at LANL for the entire disposition pathway prior to shipment to the WIPP facility. Under this Sub-Alternative, NNSA analyzes the impacts of shipping 34 MT of surplus pit plutonium from Pantex to LANL, PDP at LANL, and shipment of the decontaminated and oxidized HEU to Y-12. NNSA would rely on expanding existing capabilities at LANL in PF-4 and modifying or building additional support facilities. NNSA also analyzes the impacts of processing 7.1 MT of non-pit surplus plutonium at LANL in PF-4. Under the All LANL Sub-Alternative NNSA considers the impacts of dilution in PF-4 and C&P of the diluted plutonium oxide defenserelated CH-TRU waste for shipment to and disposal at the WIPP facility.

#### All SRS Sub-Alternative

Under the All SRS Sub-Alternative, NNSA would use only capabilities at SRS for the entire disposition pathway prior to shipment to the WIPP facility. Under this sub-alternative, NNSA analyzes the impacts of shipping 34 MT of surplus pit plutonium from Pantex to SRS and the disassembly and processing of the 34 MT of surplus pit plutonium and processing 7.1 MT of non-pit surplus plutonium in a new capability installed at SRS in either K-Area or F-Area. NNSA analyzes the subsequent shipment of the decontaminated and oxidized HEU to Y-12 and the shipment of by-product material to LANL. Under this Sub-Alternative, NNSA considers the impacts of dilution and C&P of the diluted plutonium oxide defense-related CH-TRU waste in SRS's K-Area for shipment to and disposal at the WIPP facility.

#### No Action Alternative

The No Action Alternative is the continued management of 34 MT of surplus plutonium. This includes (1) continued storage of surplus pits at Pantex, (2) continuing the plutonium mission at LANL to process up to 400 kg of actinides (including surplus plutonium) per year, and (3) disposition of up to 7.1 MT of non-pit surplus plutonium for which the disposition decision, using the dilute and dispose strategy, was announced in NNSA's 2020 AROD (85 FR 53350).

#### **Public Involvement**

The SPDP EIS is an element of the NEPA strategy related to the disposition of surplus plutonium, which NNSA

announced in the Notice of Intent published in the **Federal Register** on December 16, 2020 (85 FR 81460). In that announcement, NNSA provided information regarding NNSA's overall NEPA strategy related to fulfilling the purpose and need to disposition 34 MT of surplus plutonium.

On December 16, 2022, NNSA electronically published the Draft SPDP EIS and published an NOA in the Federal Register announcing a 60-day public comment period for the Draft SPDP EIS (87 FR 77096). EPA also published its NOA of the Draft SPDP EIS on December 16, 2022 (87 FR 77106). The comment period was scheduled to end on February 14, 2023. On February 7, 2023, NNSA notified the EPA that it was extending the comment period until March 16, 2023. On February 10, 2023, the EPA published a notice in the Federal Register that announced the extension to the public comment period (88 FR 8843). NNSA held three in-person public hearings and one internet-based (with telephone access) virtual public hearing. The inperson public hearings were held on January 19, 2023, in North Augusta, South Carolina, on January 24, 2023, in Carlsbad, New Mexico, and on January 26, 2023, in Los Alamos, New Mexico. The virtual public hearing was held on January 30, 2023. In addition to the public hearings, the public was encouraged to provide comments via U.S. postal mail, by phone, or electronically via email. NNSA received 121 comment documents from individuals, interested groups, and Federal, State, and local agencies during the public comment period on the Draft SPDP EIS.

NNSA considered all comments received before May 2023, on the Draft SPDP EIS in preparing the Final EIS and revised the Draft EIS to incorporate changes as a result of public comments. The Final EIS also includes NNSA's responses to all comments received.

NNSA will consider the environmental impact analysis presented in the Final SPDP EIS, along with other information, when making decisions regarding surplus plutonium disposition. NNSA will then issue a ROD on the proposal no sooner than 30 days following the date that EPA publishes its NOA in the **Federal Register**.

## **Signing Authority**

This document of the Department of Energy was signed on December 19, 2023, by Jill Hruby, Under Secretary for Nuclear Security and Administrator, National Nuclear Security Administration, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the Federal Register.

Signed in Washington, DC, on January 12, 2024

#### Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

#### **DEPARTMENT OF ENERGY**

# Federal Energy Regulatory Commission

[Docket No. ER24-847-000]

## Sunlight Road Solar, L.L.C.; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Sunlight Road Solar, L.L.C.'s application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is February 1, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at http://www.ferc.gov. To facilitate electronic service, persons with internet access who will eFile a document and/or be

listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the Federal Register, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (http:// www.ferc.gov). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ ferc.gov*.

Dated: January 12, 2024.

## Debbie-Anne A. Reese,

Acting Secretary.
