

Demonstration Project. TerraPower further stated that a delay in the construction of EI NST SSCs within the scope of this exemption until the projected date for issuance of the CP would result in substantial costs due to the resulting delays in construction and commercial operation. Therefore, the NRC staff has determined that special circumstances exist in this case because compliance with a regulation would result in undue hardship.

E. Commission Consideration of Factors in 50.12(b)

For exemptions permitting the conduct of activities prior to the issuance of a CP prohibited by 10 CFR 50.10, the Commission may grant the exemption upon considering and balancing four factors. The NRC staff considered the balancing factors for granting such an exemption and its evaluation is documented in the environmental assessment (EA) that is associated with this

exemption. The staff made a finding of no significant impact.

F. Expiration

This exemption expires upon issuance of a construction permit to USO for Kemmerer 1.

G. Environmental Considerations

In accordance with 10 CFR 51.21, the NRC has prepared an EA that analyzes the environmental effects of the proposed action. The NRC staff determined that the granting of these exemptions will not have a significant effect on the quality of the human environment. Based on the results of the EA and in accordance with 10 CFR 51.31(a), the NRC has prepared a finding of no significant impact for the proposed exemption. That EA and FONSI were published in the **Federal Register** on May 7, 2025 (90 FR 19322)

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12

the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances are present. Therefore, the Commission hereby grants USO a one-time exemption from the definition of construction in 10 CFR 50.10(a)(1)(iv) for the proposed Kemmerer 1. Issuance of this exemption shall not be deemed to constitute a commitment to issue a CP to USO for the proposed Kemmerer 1. In addition, per 10 CFR 50.12, during the period of this exemption, any activities conducted shall be carried out in a manner that will minimize or reduce their environmental impact.

The exemption is effective on May 7, 2025.
