

the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: NESHAP for Area Sources: Polyvinyl Chloride and Copolymer Production, Primary Copper Smelting, Secondary Copper Smelting, and Primary Nonferrous Metals—Zinc, Cadmium, and Beryllium (Renewal), were proposed on October 16, 2006, and promulgated on January 23, 2007. These regulations apply to any new and existing primary copper smelter, a new secondary copper smelter, a new or existing primary zinc production facility or a primary beryllium production facility that is an area source of hazardous air pollutant (HAP) emissions. An affected source is existing, if they commenced construction or reconstruction before October 6, 2006, and a new source if they commenced construction or reconstruction on or after October 6, 2006.

Owners and operators of a new and existing area source is subject to the General Provision (40 CFR part 63, subpart A). An existing affected source is required to submit an initial notification of applicability and a notification of compliance status. They are also required to certify initial compliance with particulate matter (PM) limits based on previous performance test results. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least five years following the collection of such measurements, maintenance reports, and records.

All reports are sent to the delegated State or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart EEEEEEE; 40 CFR part 63, subpart FFFFFFFF; 40 CFR part 63, subpart DDDDDDD; 40 CFR part 63, subpart GGGGGG; 40 CFR part 61, subpart F; 40 CFR part 61, subpart C; as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that has been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control

Number for EPA regulations listed in 40 CFR part 9 and 48 CFR chapter 15, are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average 12 hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Polyvinyl Chloride and Copolymer Production, Primary Copper Smelting, Secondary Copper Smelting, and Primary Nonferrous Metals—Zinc, Cadmium, and Beryllium.

Estimated Number of Respondents: 5.

Frequency of Response: Initially.

Estimated Total Annual Hour Burden: 46.

Estimated Total Annual Cost: \$4,326, which includes \$4,326 in labor costs, no capital/startup costs, and no operation and maintenance (O&M) costs.

Changes in the Estimates: In this ICR, we have accounted for all five sources as compared to the previous ICR. There are no new sources and are not anticipated to change over the next three year; the growth rate for the industry is very low, negative or nonexistent, thus, there is no significant change in the overall number of sources. A change in the cost burden was due to an increase in the hourly labor rates.

Title: Distribution of Offsite Consequence Analysis Information under Section 112(r)(7)(H) of the Clean Air Act (CAA) (Renewal).

ICR number: EPA ICR No. 1981.04, OMB Control No. 2050-0172.

ICR Status: This ICR is scheduled to expire on January 31, 2010. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: Clean Air Act (CAA) section 112(r)(7) required EPA to promulgate reasonable regulations and appropriate guidance to provide for the prevention and detection of accidental releases and for responses to such releases. The regulations include requirements for submittal of a risk management plan (RMP) to EPA. The RMP includes information on offsite consequence analyses (OCA) as well as other elements of the risk management program.

On August 5, 1999, the President signed the Chemical Safety Information, Site Security, and Fuels Regulatory Relief Act (CSISFRRRA). The Act required the President to promulgate regulations on the distribution of OCA information (CAA section 112(r)(7)(H)(ii)). The President delegated to EPA and the Department of Justice (DOJ) the responsibility to promulgate regulations to govern the dissemination of OCA information to the public. The final rule was published on August 4, 2000 (65 FR 48108). The regulations imposed minimal requirements on the public, state and local agencies that request OCA data from EPA. The state
