Excess Uranium Management: Secretarial Determination of No Adverse Impact on the Domestic Uranium Mining, Conversion, and Enrichment Industries

AGENCY: National Nuclear Security Administration, Department of Energy

ACTION: Notice.

SUMMARY: On August 2, 2015, the Secretary of Energy issued a determination ("Secretarial Determination") covering the sale or transfer of high-assay low enriched uranium for medical isotope development projects. The Secretarial Determination covers transfers of up to 25 kilograms uranium (kgU) per year of low enriched uranium (LEU) at up to 19.75 percent uranium-235 for transfers in the two years following approval of the determination to support molybdenum-99 producers in commercial research and isotope production applications. For the reasons set forth in the Department's "Analysis of Potential Impacts of Uranium Transfers on the Domestic Uranium Mining, Conversion, and Enrichment Industries," which is incorporated into the determination, the Secretary determined that these transfers will not have an adverse material impact on the domestic uranium mining, conversion, or enrichment industry.
