Title: Advanced Methods to Target and Eliminate Unlawful Robocalls, CG Docket No. 17-59.

Form Number: N/A.

Type of Review: New collection.

Respondents: Businesses or other for-profit entities; not-for-profit institutions; Federal Government; State, Local or Tribal Government.

Number of Respondents and Responses: 3,666 respondents; 15,375,326 responses.

Estimated Time per Response: .004 hours (15 seconds) to 32 hours.

Frequency of Response: Monthly, one time, and on occasion reporting requirements; recordkeeping requirement.

Obligation to Respond: Mandatory. Statutory authority for this information collection is contained in sections 227 and 251(e)(1) of the Telecommunications Act of 1996.

Total Annual Burden: 290,233 hours.

Total Annual Cost: None.

Nature and Extent of Confidentiality: An assurance of confidentiality is not offered because this information collection does not require the collection of personally identifiable information from individuals.

Privacy Impact Assessment: No impact(s).

Needs and Uses: On December 12, 2018, the Commission adopted rules in FCC 18-177, *Second Report and Order*, published at 84 FR 11226, March 26, 2019, which contain new information collection requirements. Specifically, the Commission concluded that the obligation to provide permanent disconnect information will apply to all reporting carriers as defined in the Commission's numbering rules, which include wireless, wireline, and interconnected Voice over internet Protocol providers that obtain numbers from the North American Numbering Plan Administrator. As part of the Commission reporting requirements, reporting carriers must provide, among other things, the most recent date each North American Numbering Plan telephone number allocated or ported to the reporting carrier was permanently disconnected. The telephone number and date of permanent disconnection will allow voluntary users of the database to determine whether a number has been permanently disconnected prior to calling that number, thereby protecting against unwanted calls to consumers and potential Telephone Consumer Protection Act liability for callers. Reporting carriers and voluntary users of the reassigned numbers database may also need to provide contact information, including names, address, and telephone number, to enable the database administrator to contact the reporting carrier in case there are any issues with their submission.

The Commission has referred to the North American Numbering Council the development of a technical requirements document for the reassigned numbers database for review by the Commission. The technical requirements document will contain a single, unified set of functional and interface requirements for: Technical interoperability and operational standards; the user interface specifications and data format for service providers to report to the Administrator; the user interfaces and other means by which callers may submit queries, including providing callers the abilities for high-volume and batch processing or to submit individual queries; appropriate safeguards to protect the privacy and security of subscribers, protect the database from unauthorized access, and ensure the security and integrity of the data; and keeping records of service providers' reporting and accounting.
