Title: Recordkeeping and Reporting Requirements for the Fuel Quality Regulations for Diesel Fuel Sold in 2001 and Later Years (Final Rule) (OMB Control No. 2060-0308, EPA ICR Number 1718.04). This is a request for a revised collection. Under the OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The pollution emitted by diesel engines contributes greatly to our nation's continuing air quality problems. New emissions standards for these engines and vehicles will apply starting with model year 2007. Since the new technology requires low sulfur diesel fuel containing 15 parts per million (ppm) sulfur or less, the regulations at 40 CFR part 80, subpart I, require the availability of 15 ppm by no later than 2006, with all motor vehicle diesel fuel required to meet the 15 ppm standard by 2010. The recordkeeping and reporting requirements associated with this program are necessary to ensure its environmental benefits. They are designed to be consistent with existing requirements. Many reporting items represent one-time burdens, including applications for exemptions or specific flexibilities (including small refiner status). In addition, annual reporting requirements associated with this program cease after 2010, when all motor vehicle diesel fuel must meet the 15 ppm standard.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB

control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 166 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Domestic and foreign refiners, importers, and fuel additives manufacturers.

Estimated Number of Respondents: 450

Frequency of Response: On occasion/annual

Estimated Total Annual Hour Burden: 72,648 hours.

Estimated Total Annual Cost: \$9,208,880, includes \$4,800,000 annualized capital or O&M costs.

Changes in the Estimates: This rule increases the estimate by 72,648 hours over the burden currently identified in the OMB Inventory of Approved ICR Burdens for this program.

Dated: December 18, 2002.

Oscar Morales, Director,

Collection Strategies Division.
