

other half of the surface estate is owned by various private entities with a small amount owned by a Peabody Energy Corporation subsidiary.

The tract contains surface mineable coal reserves in the Wyodak-Anderson coal zone currently being recovered in the adjacent, existing mines. On the LBA tract, there are two mineable seams, the Wyodak-Anderson 1 (Anderson) and the Wyodak-Anderson 2 (Canyon), located in the southern portion of the LBA that merge into a single seam in the northern portion. The total coal thickness averages about 77 feet with the shallower Anderson seam slightly thicker than the deeper Canyon seam where two seams occur. The two seams can be separated by as much as 80 feet of interburden. Overburden depths to the Anderson range from about 160 to 460 feet thick.

The tract contains an estimated 401,830,508 tons of mineable coal. This estimate of mineable reserves includes the two seams mentioned above but does not include any tonnage from localized seams or splits containing less than 5 feet of coal. It does not include the adjacent State of Wyoming coal although these reserves are expected to be recovered in conjunction with the LBA tract. It also excludes coal within and along the railroad right of way as required by typical mining practices. The total mineable stripping ratio of the coal in bank cubic yards per ton is approximately 4.8:1. Potential bidders for the LBA tract should consider the recovery rate expected from thick and multiple seam mining.

The South Porcupine LBA coal is ranked as subbituminous C. The overall average quality on an as-received basis is 8,905 British Thermal Units per pound containing about 0.20 percent sulfur. These quality averages place the coal reserves near the high end of the range of coal quality currently being mined in the Wyoming portion of the Powder River Basin.

The tract in this lease offering contains split estate lands. There are qualified surface owners as defined in the regulations at 43 CFR 3400.0–5(gg). Consent granted by the qualified surface owners has been filed with and verified by the BLM. The LBA tract lands included in the consent are:

T. 41 N., R. 71 W., 6th Principal Meridian  
Sec. 13, lots 12 through 14 inclusive;  
Sec. 14, lots 1, 2, 8, and 18; and  
Sec. 24, lots 3, 4, 17, 19, and 21.

Containing 396.79 acres, more or less, in Campbell County, Wyoming.

The purchase price of the consent as stated in the consent documents is  
“\* \* \* an overriding royalty of three

percent (3%) of the gross realization of all coal mined and sold from the Subject Property.”

The tract will be leased to the qualified bidder of the highest cash amount provided that the high bid meets or exceeds the BLM's estimate of the fair market value (FMV) of the tract. The minimum bid for the tract is \$100 per acre or fraction thereof. No bid that is less than \$100 per acre, or fraction thereof, will be considered. The bids should be sent by certified mail, return receipt requested, or be hand delivered. The BLM Wyoming State Office Cashier will issue a receipt for each hand-delivered bid. Bids received after 4 p.m. local time on Tuesday, February 28, 2012, will not be considered. The minimum bid is not intended to represent FMV. The FMV of the tract will be determined by the Authorized Officer after the sale. The lease that may be issued as a result of this offering will provide for payment of an annual rental of \$3 per acre, or fraction thereof, and a royalty payment to the United States of 12.5 percent of the value of coal produced by surface mining methods. The value of the coal will be determined in accordance with 30 CFR 1206.250.

Pursuant to the regulation at 43 CFR 3473.2(f), the applicant for the South Porcupine Tract, BTU Western Resources, Inc., has paid a total case-by-case cost recovery processing fee in the amount of \$83,694. The successful bidder for the South Porcupine Tract, if someone other than the applicant, must pay to the BLM the \$83,694 previously paid by BTU Western Resources, Inc. Additionally, the successful bidder must pay all processing costs the BLM will incur after the date this sale notice is published in the **Federal Register**, which are estimated to be \$10,000.

Bidding instructions for the LBA tract offered and the terms and conditions of the proposed coal lease are available from the BLM Wyoming State Office at the address above. Case file documents, WYW176095, are available for inspection at the BLM Wyoming State Office.
