[Project No. P-2375-035]

International Paper Company; Notice of Availability of Environmental Assessment

September 30, 2002.

In accordance with the National Environmental Policy Act of 1969, as amended, and the Federal Energy Regulatory Commission's (Commission) regulations (18 CFR part 380), Commission staff have reviewed an application for a non-capacity related license amendment at the Riley-Jay-Livermore Project, FERC No. 2375, and have prepared an Environmental Assessment (EA) on the application. The project is located on Androscoggin River at the junction of Franklin, Androscoggin, and Oxford Counties, Maine.

Specifically, the project licensee (International Paper Company) has requested Commission approval to amend the present license to maintain the existing Livermore powerhouse as is, and construct a new powerhouse to contain a single new turbine and generator with an installed capacity of 1 MW. This unit will discharge into the upper portion of the lower bypass reach and will serve as a minimum flow unit with a hydraulic capacity of 450 cfs, which would bring the Livermore development's total hydraulic capacity to 3,906 cfs, instead of the authorized hydraulic capacity of 5,400 cfs. The authorized installed capacity of the project would be reduced from 23,185 kW to 19,725 kW. In the EA, Commission staff have analyzed the
