SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) authorizes the Gulf of Mexico Fishery Management Council (Council) to prepare and amend fishery management plans for any fishery in waters under its jurisdiction. National Marine Fisheries Service (NMFS) manages the shrimp fishery in the waters of the Gulf of Mexico (Gulf) under the Shrimp Fishery Management Plan (FMP). The electronic logbook (ELB) regulations for the Gulf shrimp fishery may be found at 50 CFR § 622.5(a)(iii).

There are currently approximately 1,563 permitted vessels that harvest shrimp from the Exclusive Economic Zone (EEZ), and the Council estimates that there are over 13,000 boats that fish in state waters. With such a large number of vessels of differing sizes, gears used, and fishing capabilities compounded by seasonal variability in abundance and price and the broad geographic distribution of the fleet, ELBs provide a more precise means of estimating the amount of fishing effort than current methods. Using ELBs to improve estimating fishing effort will help improve estimating bycatch in the Gulf shrimp fleet.

II. Method of Collection

The electronic logbook autonomously collects effort data and is downloaded by contract personnel every 2-3 months. The electronic logbook memory chip will be removed from the unit and downloaded at the contractor site in College Station, Texas. A new logbook memory chip will replace the removed memory chip, a process taking less than one minute.

III. Data

Endangered and Threatened Species; Notice of Intent To Update a Recovery Plan for the Blue Whale and Prepare a Recovery Plan for the North Pacific Right Whale

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent to update and prepare recovery plans; request for information.

SUMMARY: The National Marine Fisheries Service (NMFS) is announcing its intent to update a recovery plan for the blue whale (*Balaenoptera musculus*) and prepare a recovery plan for the North Pacific right whale (*Eubalaena japonica*) and requests information from the public. NMFS is required by the Endangered Species Act of 1973 (ESA), as amended to develop plans for the

conservation and survival of federally listed species, *i.e.*, recovery plans.

DATES: To allow NMFS adequate time to conduct the reviews, all information must be received no later than May 17, 2012.

ADDRESSES: You may submit comments on these documents, identified by NOAA–NMFS–2012–0091, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal www.regulations.gov. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (*e.g.*, name, address, etc.) submitted voluntarily by the sender will be publicly accessible. SUPPLEMENTARY INFORMATION: Management responsibility for blue whales and North Pacific right whales lies with the Secretary of Commerce and has been delegated to NMFS. As such, NMFS is charged with the recovery of blue and North Pacific right whales, which are listed as endangered under the ESA. The recovery planning process is guided by the statutory language of

Section 4(f) of the ESA and NMFS policies. Recovery planning identifies all methods and procedures that are necessary to recover any endangered species or threatened species. Section 4(f)(1)(B) of the ESA specifies that recovery plans must incorporate in each plan (i) a description of such site-specific management actions as may be necessary to achieve the plan’s goal for the conservation and survival of the species; (ii) objective, measurable criteria which when met, would result in a determination, that the species be removed from the list; and (iii) estimates of the time required and cost to carry out those measures needed to achieve the plan’s goal and to achieve intermediate steps toward that goal.

Section 4(f)(4) of the ESA requires that public notice and an opportunity for public review and comment be provided during recovery plan development. NMFS requests relevant information from the public during preparation of the draft Recovery Plans. Such information should address: (a) criteria for removing the these whales from the list of threatened and endangered species; (b) factors that are presently limiting, or threaten to limit, the survival of the blue and North Pacific right whales; (c) actions to address limiting factors and threats; (d) estimates of time and cost to implement recovery actions; and (e) research, monitoring and evaluation needs. Upon completion, the draft Recovery Plans will be available for public review and comment through the publication of a **Federal Register Notice**.
