

(5) Technical Assistance (TA) Post Event form. This form is distributed to technical assistance participants at the end of the TA event. This form asks approximately 30 questions of each individual that participated in the TA event. TA participants are asked to report demographic information, education, profession, field of study, status of certification or licensure, workplace role, employment setting,

and satisfaction with the quality of the event and event materials, and to assess their level of skills in the topic area. No revisions are being made to the form. CSAT is proposing to continue to use the form as is.

The information collected on the ATTC forms will assist CSAT in documenting the numbers and types of participants in ATTC events, describing the extent to which participants report

improvement in their clinical competency, and which method is most effective in disseminating knowledge to various audiences. This type of information is crucial to support CSAT in complying with GPRA reporting requirements and will inform future development of knowledge dissemination activities.
