SUPPLEMENTARY INFORMATION:

I. Background

The Postal Service is seeking to implement an initiative that will allow for the tracking of assets and activities on the workroom floor. This asset and activity tracking will use Bluetooth chip technology associated with ID badges for employees, contractors and visitors within a building or facility. This tracking functionality will facilitate the collection of workhour statistics, including time spent on various activities and duties, allow employees to perform clock rings, and help account for employees during an emergency evacuation from selected facilities.

II. Rationale for Changes to USPS Privacy Act Systems of Records

The Postal Service is proposing to modify SOR 500.000 Property Management Records, to allow for the tracking of assets and activities on the workroom floor. The SOR will be revised accordingly in the following manners:

- Add four new Purposes of the System: #s 13,14, 15, and 16.
- Add one new Category of Records in the System, # 14
- Add one new Policy and Practice for Retrieval of Records: # 7
- Add one new Policy and Practice for Retention and Disposal of Records: # 8

III. Description of the Modified System of Records

Pursuant to 5 U.S.C. 552a (e)(11), interested persons are invited to submit written data, views, or arguments on this proposal. A report of the proposed revisions has been sent to Congress and to the Office of Management and Budget for their evaluations.
