

I. Abstract

The NASA Ames Research Center, Human Systems Integration Division, manages voluntary safety reporting systems to collect and share safety information including, but not limited to, the NASA Aviation Safety Reporting System (ASRS) and the Confidential Close Call Reporting System (C3RS). Both systems are voluntary reporting systems for the reporting of safety incidents, events, or situations. Respondents include, but are not limited to, any participant involved in safety-critical domains such as aviation or railway operations including commercial and general aviation pilots, drone operators, air traffic controllers, flight attendants, ground crews, maintenance technicians, dispatchers, train engineers, conductors, and other members of the public.

The collected safety data are used by NASA, Federal Aviation Administration (FAA), Federal Railroad Administration (FRA), and other organizations that are engaged in research and the promotion of safety. The data are used to (1) Identify deficiencies and discrepancies so that these can be remedied by appropriate authorities, (2) Support policy formulation and planning for improvements and, (3) Strengthen the foundation of human factors safety research. Respondents are not reimbursed for associated cost to provide the information. Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

II. Methods of Collection

NASA collects this information electronically and that is the preferred manner, however information may also be collected via mail.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), “Final environmental impact statement—notice of availability,” the NRC is making available NUREG–2248, which concerns the NRC’s final EIS for the proposed renewal of WEC’s license SNM–1107 for an additional 40 years. A Notice of Availability of the draft EIS (NUREG–2248) was published in the **Federal Register** (FR) on August 6, 2021, by the NRC (86 FR 43276) and the U.S. Environmental Protection Agency (86 FR 43236). The public comment period on the draft EIS closed on September 20, 2021. On September 28, 2021, the NRC re-opened the public comment period until November 19, 2021 to allow more time for the public to submit comments (86 FR 53694). The comments received are addressed in the final EIS. The final EIS is available as indicated in the **ADDRESSES** section of this document.

II. Discussion

The NRC is issuing the final EIS for an application from WEC requesting to renew its SNM license SNM–1107 to continue operating the CFFF for an additional 40 years. The CFFF is located in Hopkins, South Carolina, and has been operating since 1969. The WEC’s license (SNM–1107) was last renewed by the NRC in 2007 for 20 years and will expire in September 2027. The proposed action is the renewal of the SNM–1107 license to allow the WEC to continue licensed operations and activities at the CFFF site for an additional 40 years from the date the NRC approves the license renewal request.

The final EIS is being issued as part of the NRC’s process to decide whether to renew the SNM–1107 license pursuant to 10 CFR part 70. In this final EIS, the NRC staff has assessed the potential environmental impacts of the license renewal for an additional 40 years. The NRC staff assessed the impacts of the proposed action, the no-action alternative, and a 20-year license
