National Oceanic and Atmospheric Administration

50 CFR Part 660

[Docket No. 140904754-5188-02]

RIN 0648-BF63

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; 2015-2016 Biennial Specifications and Management Measures; Inseason Adjustments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; inseason adjustments to biennial groundfish management measures.

SUMMARY: This final rule announces inseason changes to management measures in the Pacific Coast groundfish fisheries. This action, which is authorized by the Pacific Coast Groundfish Fishery Management Plan (PCGFMP), is intended to allow fisheries to access more abundant groundfish stocks while protecting overfished and depleted stocks. This document also announces a prohibition on the use of midwater trawl gear in the Shorebased Individual Fishing Quota (IFQ) Program shoreward of the boundary line approximating the 150 fm (274 m) depth contour via automatic action, with actual notice (by phone and email) to participants, at noon local time, November 26, 2015 in order to reduce the risk of exceeding the canary rockfish annual catch limit (ACL).

DATES: This final rule is effective January 1, 2016. The depth restrictions for midwater trawl gear were made through automatic action, and are published in the **Federal Register** as soon as practicable after they are issued. The depth restriction for vessels using midwater trawl gear, which was announced by actual notice (by phone and email) prior to implementation, is applicable from noon local time, November 26, 2015 through midnight local time, December 31, 2015.

SUPPLEMENTARY INFORMATION:

Electronic Access

This rule is accessible via the Internet at the Office of the Federal Register Web site at <https://www.federalregister.gov>. Background information and documents are available at the Pacific Fishery Management Council's Web site at <http://www.pcouncil.org/>. Copies of the final environmental impact statement (FEIS) for the Groundfish Specifications and Management Measures for 2015-2016 and Biennial Periods Thereafter are available from Donald McIsaac, Executive Director, Pacific Fishery Management Council (Council), 7700 NE Ambassador Place, Portland, OR 97220, phone: 503-820-2280.

Background

The Pacific Fishery Management Council (Council)—in coordination with Pacific Coast Treaty Indian Tribes and the States of Washington, Oregon, and California—recommended changes to groundfish management measures at its November 13-19, 2015, meeting. Specifically, the Council recommended a revised schedule of trip limits for big skate in the Shorebased IFQ Program for 2016. This rule revises big skate trip limits consistent with the Council's November recommendations.

Before 2015, big skate was managed as a component stock within the Other Fish complex. The big skate overfishing limit (OFL) estimate, along with the estimated OFLs for the other species in the complex, contributed to the OFL specified in regulation for the Other Fish complex. Species managed in complexes do not have OFLs specified in regulation. The Council recommended, and NMFS approved, the designation of big skate as an ecosystem component species, beginning in 2015 (80 FR 12567, March 10, 2015). As described in the inseason action that implemented trip limits for big skate in 2015 (80 FR 31858, June 4, 2015), new information available during 2015 indicated that harvest of big skate was much higher than anticipated and was approaching or exceeding the 2014 estimated OFL contribution. The Council recommended, and NMFS implemented, trip limits on June 1, 2015, to reduce impacts to big skate in the Shorebased IFQ Program. Trip limits for big skate were further adjusted on August 14, 2015, after review of updated fishery information and best available information regarding discard mortality of big skate (80 FR 50212, August 19, 2015). As part of the ongoing development of the 2017-2018

specifications, the Council is reconsidering whether big skate should be reclassified because the species may not be appropriate as an ecosystem component species.

At its November meeting, the Council considered updated fishery information and further refined big skate trip limits for the second year of the biennial cycle. The Council's Groundfish Management Team (GMT) continued analysis of available fishery data to estimate and project catch of big skate in the Shorebased IFQ Program under different trip limit scenarios. The Council considered an apparent seasonal fluctuation in both frequency and magnitude of big skate landings, with higher catch in the summer and lower catch in the winter. The Council also considered feedback from individuals in the Shorebased IFQ Program regarding catch patterns and targeting practices.

The Council recommended, and NMFS is implementing, the following big skate trip limits in the Shorebased IFQ Program, beginning January 1, 2016: 5,000 lbs/2 months (2,268 kg/2 months) for Period 1; 25,000 pounds/2 months (11,340 kg/2 months) for Period 2; 30,000 pounds/2 months (13,608 kg/2 months) for Period 3; 35,000 pounds/2 months (15,876 kg/2 months) for Period 4; 10,000 pounds/2 months (4,536 kg/2 months) for Period 5; and 5,000 pounds/2 months (2,268 kg/2 months) for Period 6. Best estimates indicate that total mortality of big skate through the end of 2016 under this trip limit structure would be 450 mt, 91 mt lower than the estimated 2016 OFL of 541 mt and 44 mt lower than the estimated 2016 ABC of 494 mt.

Depth Restriction via Actual Notice in the Shorebased IFQ Program

Subsequent to the November Council meeting, higher than anticipated catch of canary rockfish occurred in the Shorebased IFQ Program. NMFS took automatic action to impose a depth restriction for vessels using midwater trawl gear in the Shorebased IFQ Program, applicable at noon local time, November 26, 2015. This rule serves as notification of the November 26, 2015 automatic action.

The Shorebased IFQ Program may be restricted or closed, as determined necessary by the Regional Administrator, as a result of projected overages within the Shorebased IFQ Program, the Mothership Coop Program, or the Catcher/Processor Coop Program. As of November 24, 2015, the Shorebased IFQ Program was projected to exceed the total quota pounds available to the sector (2015 allocation, plus surplus carryover from 2014) if

current harvest levels continued and without management action. At noon, on November 26, 2015 the National Marine Fisheries Service (NMFS) prohibited the use of midwater trawl gear in the Shorebased IFQ Program for the remainder of 2015, shoreward of the boundary line approximating the 150 fathom depth contour (150 fm line). This bycatch reduction measure was taken as an automatic action, per regulations at 50 CFR 660.140(a)(3), to reduce potential impacts on canary rockfish, an overfished species subject to rebuilding requirements under the Magnuson Stevens Fishery Conservation and Management Act. NMFS provided actual notice of the closure to participants by phone and email. In addition, NMFS posted on the West Coast Region's internet site to provide notice to the affected fishers. Implementation of the prohibition on using midwater trawl gear (cease fishing) shoreward of the 150 fm line was effective 22 hours after the Public Notice, to allow for additional time for the public to become aware of the change in depth restrictions.

The Shorebased IFQ Program has a 2015 allocation of 43.26 mt of canary rockfish (with surplus carryover pounds from 2014: 47.28 mt). Higher than anticipated catch of canary rockfish occurred in the Shorebased IFQ Program by vessels using midwater trawl gear, exceeding the 2015 Shorebased IFQ Program allocation. Midwater trawl gear has been responsible for an increasing proportion of the annual canary rockfish landings in the Shorebased IFQ Program and data from the Northwest Fisheries Science Center shelf-slope bottom trawl survey indicates that canary rockfish are distributed overwhelmingly shoreward of the boundary line approximating the 150 fm depth contour.

Therefore, NMFS implemented a depth restriction for vessels using midwater trawl gear in the Shorebased IFQ Program to reduce the risk of exceeding the total amount of canary rockfish available the Shorebased IFQ Program, total trawl allocation, and the canary rockfish ACL, through the end of the year.

Technical Edits

LEFG and OA Sablefish Trip Limits

Regulatory changes published in this rule also clarify, but do not revise, sablefish trip limits in the limited entry fixed gear and open access fisheries north of 36° N. lat. The 2016 sablefish ACL is higher than in 2015 and the Council recommended and NMFS implemented a schedule of slightly higher trip limits for the second year of

the biennial period, as described in the January 6, 2015 proposed rule (80 FR 687) and implemented in Tables 2 North and 2 South, Subpart E and Tables 3 North and 3 South, Subparts F (80 FR 12567, March 10, 2015). Because of the format of these tables, the higher 2016 trip limits were published in the footnotes, anticipating that an inseason for January 1, 2016 would incorporate movement of those trip limits from the footnote to the body of the table. This formatting change does not revise the 2016 sablefish trip limits for non-IFQ fisheries north of 36° N. lat. that were described and implemented through notice and comment rulemaking. Accordingly, this rule modifies Tables 2 North and 2 South, Subpart E and Tables 3 North and 3 South, Subparts F by moving the schedule of 2016 trip limits, unchanged, from footnotes into the body of the tables.

Classification

This final rule makes routine inseason adjustments to groundfish fishery management measures, based on the best available information. This document also serves as notice of an automatic action, based on the best available information. Both are consistent with the PCGFMP and its implementing regulations.

This action is taken under the authority of 50 CFR 660.60(c) and (d), and 660.140(a)(3) and is exempt from review under Executive Order 12866.

The aggregate data upon which these actions are based are available for public inspection at the Office of the Administrator, West Coast Region, NMFS, during business hours.

NMFS finds good cause to waive prior public notice and comment on the revisions to groundfish management measures under 5 U.S.C. 553(b) because notice and comment would be impracticable and contrary to the public interest. Also, for the same reasons, NMFS finds good cause to waive the 30-day delay in effectiveness pursuant to 5 U.S.C. 553(d)(3), so that the regulatory changes in this final rule may become effective January 1, 2016.

New analysis regarding projected catch of big skate was presented to the Council at its November 2015 meeting. At that meeting, the Council recommended that these changes to big skate trip limits be implemented January 1, 2016, which is the start of the second year of the biennial cycle and the beginning of a cumulative limit period in the commercial groundfish fishery off the West Coast. These restrictions to the amount of landings must be implemented at the start of a cumulative limit period to allow

fishermen in the Shorebased IFQ Program an opportunity to continue harvesting big skate, but at a level that will not exceed the new, lower trip limit that will be imposed in January 2016. The trip limits recommended by the Council and implemented by NMFS in this action are anticipated to keep catch of big skate below its estimated OFL, if implemented on January 1. If the recommended limits are not in place January 1, more restrictive measures may be necessary later in the year to keep catch of big skate below its estimated OFL. There was not sufficient time after the November meeting, when the new information was available, to undergo proposed and final rulemaking before January 1.

The depth restrictions in the Shorebased IFQ Program implemented by the Regional Administrator via actual notice are intended to reduce the risk of exceeding the trawl allocation and the 2015 ACL of canary rockfish. The closed area implemented by this rule needed to be in effect during the remainder of the 2015 fishery to shift midwater trawl effort in the Shorebased IFQ Program into deeper waters where they are less likely to catch canary rockfish. Prior notice and opportunity for public comment on this depth restriction was impracticable because NMFS had insufficient time to provide prior notice and the opportunity for public comment between the time the information about catch of canary rockfish became available and when restrictions were determined to be necessary to reduce the risk of further exceeding the 2015 Shorebased IFQ Program allocation, and also reduce the risk of exceeding the 2015 canary rockfish trawl allocation and the ACL. Failure to respond with a depth restriction in a timely manner to reduce the amount by which the 2015 Shorebased IFQ Program allocation for canary rockfish was exceeded would be contrary to the public interest, as it may have required more restrictive measures, perhaps even closure of the fishery, if higher than anticipated harvest of canary rockfish continued.

For the actions to be implemented in this final rule, affording the time necessary for prior notice and opportunity for public comment would prevent NMFS from managing fisheries using the best available science to prevent overfishing in accordance with the PCGFMP and applicable law.

Delaying these changes would also keep management measures in place that are not based on the best available information. Such delay would impair achievement of the PCGFMP goals and objectives of managing for appropriate harvest levels while providing for year-

round fishing and marketing opportunities.

Accordingly, for the reasons stated above, NMFS finds good cause to waive prior notice and comment and to waive the delay in effectiveness.

List of Subjects in 50 CFR Part 660

Fisheries, Fishing, and Indian Fisheries.

Dated: December 24, 2015.

Alan D. Risenhoover,

*Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.*

For the reasons set out in the preamble, 50 CFR part 660 is amended as follows:

PART 660—FISHERIES OFF WEST COAST STATES

■ 1. The authority citation for part 660 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 773 *et seq.*, and 16 U.S.C. 7001 *et seq.*

■ 2. Tables 1 North and 1 South to part 660, subpart D, are revised to read as follows:

BILLING CODE 3510-22-P

Table 1 (North) to Part 660, Subpart D -- Limited Entry Trawl Rockfish Conservation Areas and Landing Allowances for non-IFQ Species and Pacific Whiting North of 40°10' N. Lat.

This table describes Rockfish Conservation Areas for vessels using groundfish trawl gear. This table describes incidental landing allowances for vessels registered to a Federal limited entry trawl permit and using groundfish trawl or groundfish non-trawl gears to harvest individual fishing quota (IFQ) species.

Other Limits and Requirements Apply -- Read § 660.10 - § 660.399 before using this table

TABLE 1 (North)

TABLE 1 (North)

1/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours, and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to the RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.

2/ The "modified" fathom lines are modified to exclude certain petrale sole areas from the RCA.

3/ As specified at §660.131(d), when fishing in the Eureka Area, no more than 10,000 lb of whiting may be taken and retained, possessed, or landed by a vessel that, at any time during the fishing trip, fished in the fishery management area shoreward of 100 fm contour.

4/ "Other Fish" are defined at § 660.11 and include kelp greenling, leopard shark, and cabezon in Washington

To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.

Table 1 (South) to Part 660, Subpart D -- Limited Entry Trawl Rockfish Conservation Areas and Landing Allowances for non-IFQ Species and Pacific Whiting South of 40°10' N. Lat.

This table describes Rockfish Conservation Areas for vessels using groundfish trawl gear. This table describes incidental landing allowances for vessels registered to a Federal limited entry trawl permit and using groundfish trawl or groundfish non-trawl gears to harvest individual fishing quota (IFQ) species.

1/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.											
2/ POP is included in the trip limits for Minor Slope Rockfish. Blackgill rockfish have a species specific trip sub-limit within the Minor Slope Rockfish cumulative limit. Yellowtail rockfish are included in the trip limits for Minor Shelf Rockfish. Bronzespotted rockfish have a species specific trip limit.											
3/ "Other Flatfish" are defined at § 660.11 and include butter sole, curffin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.											
4/ The commercial minimum size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.											
5/ "Other Fish" are defined at § 660.11 and include kelp greenling, leopard shark, and cabezon in Washington.											
To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.											

■ 4. Tables 3 North and 3 South to part follows:
660, subpart F, are revised to read as

Table 3 (North) to Part 660, Subpart F -- Non-Trawl Rockfish Conservation Areas and Trip Limits for Open Access Gears North of 40°10' N. lat.

Other limits and requirements apply -- Read §§660.10 through 660.399 before using this table

01012016

		JAN-FEB	MAR-APR	MAY-JUN	JUL-AUG	SEP-OCT	NOV-DEC
Rockfish Conservation Area (RCA)^{1/}:							
1	North of 46°16' N. lat.	shoreline - 100 fm line ^{1/}					
2	46°16' N. lat. - 42°00' N. lat.	30 fm line ^{1/} - 100 fm line ^{1/}					
3	42°00' N. lat. - 40°10' N. lat.	30 fm line ^{1/} - 100 fm line ^{1/}					
See §§660.60, 660.330 and 660.333 for additional gear, trip limit and conservation area requirements and restrictions. See §§660.70-660.74 and §§660.76-660.79 for conservation area descriptions and coordinates (including RCAs, YRCAs, CCAs, Farallon Islands, Cordell Banks, and EFHCAs).							
State trip limits and seasons may be more restrictive than Federal trip limits or seasons, particularly in waters off Oregon and California.							
4	Minor Slope Rockfish^{2/} & Darkblotched rockfish	Per trip, no more than 25% of weight of the sablefish landed					
5	Pacific ocean perch	100 lb/ month					
6	Sablefish	300 lb/ day, or 1 landing per week of up to 1,000 lb, not to exceed 2,000 lb/ 2 months					
7	Shortpine thornyheads and longspine thornyheads	CLOSED					
8	Dover sole, arrowtooth flounder, petrale sole, English sole, starry flounder, Other Flatfish^{3/}	3,000 lb/ month, no more than 300 lb of which may be species other than Pacific sanddabs.					
9		South of 42° N. lat., when fishing for "other flatfish," vessels using hook-and-line gear with no more than 12 hooks per line, using hooks no larger than "Number 2" hooks, which measure 0.44 in (11 mm) point to shank, and up to two 1 lb (0.45 kg) weights per line are not subject to the RCAs.					
10							
11							
12							
13	Whiting	300 lb/ month					
15	Minor Shelf Rockfish^{2/}, Shortbelly, Widow & Yellowtail rockfish	200 lb/ month					
16	Canary rockfish	CLOSED					
17	Yelloweye rockfish	CLOSED					
18	Minor Nearshore Rockfish & Black rockfish						
19	North of 42°00' N. lat.	5,000 lb/ 2 months, no more than 1,200 lb of which may be species other than black rockfish					
20	42°00' N. lat. - 40°10' N. lat.	8,500 lb/ 2 months, of which no more than 1,200 lb of which may be species other than black rockfish				6,000 lb/ 2 months, of which no more than 1,200 lb of which may be species other than black rockfish	
21	Lingcod^{6/}	100 lb/ month		600 lb/ month			100 lb/ month
22	Pacific cod	1,000 lb/ 2 months					
23	Spiny dogfish	200,000 lb/ 2 months		150,000 lb/ 2 months	100,000 lb/ 2 months		
24	Longnose skate	Unlimited					
25	Other Fish^{6/} & Cabezon in Oregon and California	Unlimited					

TABLE 3 (North)

TABLE 3 (North)

Table 3 (North). Continued

		JAN-FEB	MAR-APR	MAY-JUN	JUL-AUG	SEP-OCT	NOV-DEC
26	SALMON TROLL (subject to RCAs when retaining all species of groundfish, except for yellowtail rockfish and lingcod, as described below)						
27	North	Salmon trollers may retain and land up to 1 lb of yellowtail rockfish for every 2 lbs of salmon landed, with a cumulative limit of 200 lb/month, both within and outside of the RCA. This limit is within the 200 lb per month combined limit for minor shelf rockfish, widow rockfish and yellowtail rockfish, and not in addition to that limit. Salmon trollers may retain and land up to 1 lingcod per 15 Chinook per trip, plus 1 lingcod per trip, up to a trip limit of 10 lingcod, on a trip where any fishing occurs within the RCA. This limit only applies during times when lingcod retention is allowed, and is not "CLOSED." This limit is within the per month limit for lingcod described in the table above, and not in addition to that limit. All groundfish species are subject to the open access limits, seasons, size limits and RCA restrictions listed in the table above, unless otherwise stated here.					
28	PINK SHRIMP NON-GROUNDFISH TRAWL (not subject to RCAs)						
29	North	<p>Effective April 1 - October 31: Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/month (minimum 24 inch size limit); sablefish 2,000 lb/month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of these species count toward the per day and per trip groundfish limits and do not have species-specific limits. The amount of groundfish landed may not exceed the amount of pink shrimp landed.</p>					
<p>1/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.</p> <p>2/ Bocaccio, chilipepper and cowcod rockfishes are included in the trip limits for Minor Shelf Rockfish. Splittnose rockfish is included in the trip limits for minor slope rockfish.</p> <p>3/ "Other flatfish" are defined at § 660.11 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.</p> <p>4/ For black rockfish north of Cape Alava (48°09.50' N. lat.), and between Destruction Is. (47°40' N. lat.) and Leadbetter Pnt. (46°38.17' N. lat.), there is an additional limit of 100 lbs or 30 percent by weight of all fish on board, whichever is greater, per vessel, per fishing trip.</p> <p>5/ The minimum size limit for lingcod is 22 inches (56 cm) total length North of 42° N. lat. and 24 inches (61 cm) total length South of 42° N. lat.</p> <p>6/ "Other fish" are defined at § 660.11 and include kelp greenling, leopard shark, and cabezon in Washington.</p> <p>To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.</p>

29	Shallow nearshore		600 lb/ 2 months	CLOSED	800 lb/ 2 months	900 lb/ 2 months	800 lb/ 2 months	1,000 lb/ 2 months		
30	Deeper nearshore									
31	40° 10' N. lat. - 34° 27' N. lat.	700 lb/ 2 months	CLOSED	700 lb/ 2 months	900 lb/ 2 months		1,000 lb/ 2 months			
32	South of 34° 27' N. lat.	500 lb/ 2 months		600 lb/ 2 months						
33	California scorpionfish		1,200 lb/ 2 months	CLOSED	1,200 lb/ 2 months					
34	Lingcod ^{4/}	100 lb/ month	CLOSED	400 lb/ month				100 lb/ month		
35	Pacific cod		1,000 lb/ 2 months							
36	Spiny dogfish		200,000 lb/ 2 months		150,000 lb/ 2 months	100,000 lb/ 2 months				
37	Longnose skate		Unlimited							
38	Other Fish ^{5/} & Cabezon		Unlimited							
39	RIDGEBACK PRAWN AND, SOUTH OF 38° 57.50' N. LAT., CA HALIBUT AND SEA CUCUMBER NON-GROUND FISH TRAWL									
40	NON-GROUND FISH TRAWL Rockfish Conservation Area (RCA) for CA Halibut, Sea Cucumber & Ridgeback Prawn:									
41	40° 10' N. lat. - 38° 00' N. lat.	100 fm line ^{1/} - 200 fm line ^{1/}	100 fm line ^{1/} - 150 fm line ^{1/}					100 fm line ^{1/} - 200 fm line ^{1/}		
42	38° 00' N. lat. - 34° 27' N. lat.	100 fm line ^{1/} - 150 fm line ^{1/}								
43	South of 34° 27' N. lat.	100 fm line ^{1/} - 150 fm line ^{1/} along the mainland coast; shoreline - 150 fm line ^{1/} around islands								
44		Groundfish: 300 lb/trip. Species-specific limits described in the table above also apply and are counted toward the 300 lb groundfish per trip limit. The amount of groundfish landed may not exceed the amount of the target species landed, except that the amount of spiny dogfish landed may exceed the amount of target species landed. Spiny dogfish are limited by the 300 lb/trip overall groundfish limit. The daily trip limits for sablefish coastwide and thornyheads south of Pt. Conception and the overall groundfish "per trip" limit may not be multiplied by the number of days of the trip. Vessels participating in the California halibut fishery south of 38° 57.50' N. lat. are allowed to (1) land up to 100 lb/day of groundfish without the ratio requirement, provided that at least one California halibut is landed and (2) land up to 3,000 lb/month of flatfish, no more than 300 lb of which may be species other than Pacific sanddabs, sand sole, stary flounder, rock sole, curfin sole, or California scorpionfish (California scorpionfish is also subject to the trip limits and closures in line 31).								
45	PINK SHRIMP NON-GROUND FISH TRAWL GEAR (not subject to RCAs)									
46	South	Effective April 1 - October 31: Groundfish: 500 lb/day, multiplied by the number of days of the trip, not to exceed 1,500 lb/trip. The following sublimits also apply and are counted toward the overall 500 lb/day and 1,500 lb/trip groundfish limits: lingcod 300 lb/ month (minimum 24 inch size limit); sablefish 2,000 lb/ month; canary, thornyheads and yelloweye rockfish are PROHIBITED. All other groundfish species taken are managed under the overall 500 lb/day and 1,500 lb/trip groundfish limits. Landings of all groundfish species count toward the per day, per trip or other species-specific sublimits described here and the species-specific limits described in the table above do not apply. The amount of groundfish landed may not exceed the amount of pink shrimp landed.								
1/ The Rockfish Conservation Area is an area closed to fishing by particular gear types, bounded by lines specifically defined by latitude and longitude coordinates set out at §§ 660.71-660.74. This RCA is not defined by depth contours (with the exception of the 20-fm depth contour boundary south of 42° N. lat.), and the boundary lines that define the RCA may close areas that are deeper or shallower than the depth contour. Vessels that are subject to RCA restrictions may not fish in the RCA, or operate in the RCA for any purpose other than transiting.										
2/ POP is included in the trip limits for minor slope rockfish. Blackgill rockfish have a species specific trip sub-limit within the minor slope rockfish cumulative limits. Yellowtail rockfish is included in the trip limits for minor shelf rockfish. Bronzespotted rockfish have a species specific trip limit.										
3/"Other flatfish" are defined at § 660.11 and include butter sole, curfin sole, flathead sole, Pacific sanddab, rex sole, rock sole, and sand sole.										
4/ The commercial minimum size limit for lingcod is 24 inches (61 cm) total length South of 42° N. lat.										
5/"Other fish" are defined at § 660.11 and includes kelp greenling, leopard shark, and cabezon in Washington.										
To convert pounds to kilograms, divide by 2.20462, the number of pounds in one kilogram.
