NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–498 and 50–499]

STP Nuclear Operating Company, et al., South Texas Project, Units 1 and 2; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of STP Nuclear

Operating Company (the licensee) to partially withdraw its September 22, 2003 (ML032691396), application for proposed amendment to Facility Operating License No. NPF–76 and Facility Operating License No. NPF–80 for the South Texas Project, Units 1 and 2, respectively. The facility is located in Matagorda County, Texas.

The proposed amendment would have modified the facility Technical Specifications (TSs) to change the requirements for the Engineered Safety Features sequencer and the Surveillance Requirements that are applicable in Modes 5 and 6 to provide needed clarification. In addition, the proposed amendment would correct a typographical error from requirement “c.” in TS 3.2.4 to requirement “b.”

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the **Federal Register** on November 12, 2003 (68 FR 64139). However, by letter dated September 30, 2004 (ML042800236), the licensee withdrew the proposed change except for that part which corrected the typographical error.

For further details with respect to this action, see the application for amendment dated September 22, 2003, and the licensee’s letter dated September 30, 2004, which partially withdrew the application for license amendment. Documents may be examined, and/or copied for a fee, at the NRC’s Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland.
