Rural Utilities Service

Title: Electric System Emergency Restoration Plan.

OMB Control Number: 0572-0140.

Summary of Collection: Electric power systems have been identified in Presidential Decision Directive 63, May 1998, as one of the critical infrastructures of the United States. The term "critical infrastructure" is defined in section 1016(e) of the USA Patriot Act of 2001 (42 U.S.C. 5195c(e)). To ensure that the electric infrastructure in rural America is adequately protected, Rural Utilities Service requires that all current electric borrowers enhance an existing Emergency Restoration Plan (ERP) or, if none exists, develop and maintain an ERP.

Need and Use of The Information: Rural Development Utilities Programs (RDUP) requires that all current electric borrowers conduct a Vulnerability and Risk Assessment (VRA) of its respective systems and utilize the results of this assessment to enhance an existing ERP or create an ERP if none exists. The ERP provides written procedures detailing response and restoration efforts in the event of a major system outage resulting from a natural or man made disaster. RDUP requires each electric borrower to provide annually a self-certification, in writing, that an ERP exists and that an initial VRA has been performed. If this information were not collected, vulnerabilities may exist in the electric system infrastructure. The result would be increased risk to public safety and may affect the Government loan security.

The declaration must contain, among other things, the scientific name of the plant, value of the importation, quantity of the plant, and name of the country from which the plant was harvested.
