

on a nationwide scale using uniform definitions, concepts, and procedures. The collection covers the expenditures of all agencies in the fifty State governments, the District of Columbia, and Puerto Rico that perform or fund R&D. The NCSES coordinates with the Census Bureau for the data collection. The NCSES uses this collection to satisfy, in part, its need to collect research and development expenditures data.

Fiscal data provided by respondents aid data users in measuring the effectiveness of resource allocation. The products of this data collection make it possible for data users to obtain information on such things as expenditures according to source of funding (e.g., Federal funds or State funds), by performer of the work (e.g., intramural and extramural to State agencies), by function (e.g., agriculture, energy, health, transportation, etc.), by type of work (e.g., basic research, applied research, or experimental development) for intramural performance of R&D, and by R&D plant (e.g., construction projects). Final results produced by NCSES contain state and national estimates useful to a variety of data users interested in research and development performance including: The National Science Board; the Office of Management and Budget; the Office of Science and Technology Policy and other science policy makers; institutional researchers; and private organizations.

We have analyzed responses to a question about burden which appears on the instrument. That analysis indicates that the average burden for agency respondents should be 2 hours rather than the current estimate of 3 hours. We are adjusting the burden of the collection downward accordingly.

The survey announcements and forms used in the SGRD are:

Survey Announcement. An introductory email from the Directors of the NCSES and the Census Bureau is sent to Chief of Staff of Governor's Office to announce the survey collection and to solicit assignment of a State Coordinator. The State Coordinator's Announcement is sent electronically at the beginning of each survey period to solicit assistance in identifying State agencies which may perform or fund R&D activities.

Form SRD-1. This form contains item descriptions and definitions of the research and development items collected by the Census Bureau on behalf of the NCSES. All states supply their data by electronic means.

The Census Bureau emails Chief of Staff for the 50 state governors, the

mayor of DC, and the governor of Puerto Rico requesting that they appoint a state coordinator for the survey. The Census Bureau then emails the state coordinators a spreadsheet asking them to identify State agencies that may have the capacity to perform or fund R&D. The Census Bureau subsequently emails the survey form to each State agency identified by the respective state coordinators. The form contains embedded data checks and auto-summing functionality. Agencies are asked to complete and email back the form. Alternatively, agencies can report to the Census Bureau by telephone.
