Title: State Water Quality Program Management Resource Analysis (New).

ICR Numbers: EPA ICR No. 2433.01, OMB Control No. 2040—NEW.

ICR Status: This ICR is for a new information collection activity. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on

the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA, in partnership with states, is conducting the State Water Quality Program Management Resource Analysis to enumerate current and future expenditures and resources for the administration and management of state water quality programs, and to quantify the resource needs for the administration and management of state water quality programs to implement the Clean Water Act (CWA). This effort builds on an expenditure and resource needs data collection effort conducted by EPA in collaboration with the states in 1998 and 2000.

EPA requires this information to comprehend resource expenditures and needs for the administration and management of the water quality programs under 33 U.S.C. 125 *et seq.* This effort, supported by EPA and the states, is necessary to develop strategies for better managing state water quality programs that implement the CWA, thus ensuring the long-term sustainability, efficiency, and effectiveness of these programs. This effort also helps states and EPA to effectively target resources to meet EPA's FY 2011–2015 strategic goals of protecting the nation's waters and enforcing environmental laws.

The data collection will facilitate creation of a detailed activity-based workload model to serve as a long-term budgeting, program management, and progress tracking tool for the states and EPA to use in the future. This is a one-time collection effort by the Office of Wastewater Management and responses to this ICR are voluntary.

This information will be collected by EPA and made available to the states and to the public in accordance with the requirements of the Freedom of Information Act.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 63 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently

changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: State water quality agencies.

Estimated Number of Respondents: 20.

Frequency of Response: Once, Annually.

Estimated Total Annual Hour Burden: 1,252.

Estimated Total Annual Cost: \$49,740, which includes annual labor costs only, since no capital or operation and maintenance costs are associated with this ICR.

Changes in the Estimates: This is a new collection, thus there is no currently approved ICR.

Dated: January 4, 2012.

Director, Collection Strategies Division.

Needs and Uses: On January 28, 2010, the Commission adopted a First Report and Order and Further Notice of Proposed Rulemaking ("First R&O") in MB Docket No. 09-52, FCC 10-24. To enhance the ability of federally recognized Native American Tribes to provide vital radio services to their citizens on Tribal lands, in the First R&O the Commission established a Tribal Priority for use in its radio licensing procedures. On March 3, 2011, the Commission adopted a Second Report and Order ("Second R&O"), First Order on Reconsideration, and Second Further Notice of Proposed Rule Making in MB Docket No. 09-52, FCC 11-28. On December 28, 2011, the Commission adopted a Third Report and Order in MB Docket No. 09-52, FCC 11-190 ("Third R&O"). In the Third R&O the Commission further refined the use of the Tribal Priority in the commercial FM context, specifically adopting a "threshold qualifications" approach to commercial FM application processing.

In the commercial FM context, the Tribal Priority is applied at the allotment stage of the licensing process. A Tribe or Tribal entity initiates the process by petitioning that a new Tribal

Allotment be added to the FM Table of Allotments using the Tribal Priority. A petitioner seeking to add a Tribal Allotment to the FM Table of Allotments, like all other FM allotment proponents, must file FCC Form 301 when submitting its Petition for Rule Making. Under the new "threshold qualification" procedures adopted in the Third R&O, once a Tribal Allotment has been successfully added to the FM Table of Allotments using the Tribal Priority through an FM allocations rulemaking, the Commission will announce by Public Notice a Threshold Qualifications Window ("TQ Window"). During the TQ Window, any Tribe or Tribal entity that could qualify to add that particular Tribal Allotment may file an FCC Form 301 application for that Tribal Allotment. Such an applicant must demonstrate that it meets all of the eligibility criteria for the Tribal Priority, just as the original Tribal Allotment proponent did at the allotment stage. If it wishes its previously filed Form 301 application to be considered at this stage, then during the TQ Window the original Tribal Allotment proponent must submit notice to process its pending Form 301 application immediately.

If only one acceptable application is filed during the TQ Window, whether by the original Tribal allotment proponent submitting notification to process its previously filed Form 301, or by another qualified applicant, that application will be promptly processed and the Tribal Allotment will not be auctioned. In the event that two or more acceptable applications are filed during the TQ Window, the Commission will announce a limited period in which the parties may negotiate a settlement or bona fide merger, as a way of resolving the mutual exclusivity between their applications. If a settlement or merger is reached, the parties must notify the Commission and the staff will process the surviving application pursuant to the settlement or merger. If a settlement cannot be reached among the mutually exclusive applicants, the Tribal Allotment will be auctioned during the next scheduled FM auction. At that time, only the applicants whose applications were accepted for filing during the TQ Window, as well as the original Tribal Allotment proponent, will be permitted to bid on that particular Tribal Allotment. This closed group of mutually exclusive TQ Window applicants must comply with applicable established auction procedures.

In the event that no qualifying party applies during the TQ Window, and the original Tribal allotment proponent
