

involve entities other than aircraft operators mostly located off-airport and includes facilities upstream in the air cargo supply chain, such as shippers, manufacturers, warehousing entities, distributors, third party logistics companies, and Indirect Air Carriers located in the United States.

Abstract: TSA is seeking continued approval from OMB for the collections of information contained in the ICR. Congress identified specific requirements for TSA in the area of air cargo security in the Aviation and Transportation Security Act (ATSA), Public Law 107-71: (1) To provide for screening of all property, including U.S. mail, cargo, carry-on and checked baggage, and other articles, that will be carried aboard a passenger aircraft; and (2) to establish a system to screen, inspect, report, or otherwise ensure the security of all cargo that is to be transported on passenger aircraft as soon as practicable. In the Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110-53, Congress requires that 50 percent of cargo transported on passenger aircraft is screened by February 2009, and 100 percent of such cargo be screened by August 2010. TSA issued an interim final rule (IFR) on September 16, 2009, 74 FR 47672, amending title 49 of the Code of Federal Regulations (CFR) to implement this statutory requirement.

TSA must proceed with the ICR for this program in order to continue to meet the Congressional mandates, and current and new regulations (49 CFR 1522, 1542.209, 1544.205, 1546.205, 1548, and 1549) that enable aircraft operators and other entities upstream in the air cargo supply chain to accept, screen, and transport air cargo. The uninterrupted collection of this information will allow TSA to continue to ensure implementation of these vital security measures for the protection of the traveling public.

TSA certifies qualified facilities as CCSFs. Companies seeking to become CCSFs are required to submit an application to TSA at least 90 days before the intended date of operation. TSA allows the regulated entity to operate as a CCSF in accordance with a TSA-approved security program. Prior to certification, the CCSF must also submit to an assessment by a TSA-approved validator. The regulated entities must also collect personal information and submit such information to TSA so that TSA may conduct security threat assessments (STA) for individuals with unescorted access to cargo, and who have responsibility for screening cargo under

49 CFR parts 1544, 1546, or 1548. CCSF facilities must provide information on the amount of cargo screened and other cargo screening metrics at an approved facility. CCSFs must also maintain screening, training, and other security-related records of compliance. A firm interested in operating as a TSA-approved validation firm must also apply for TSA approval. Validation firms will need to provide the following information: (1) Applications from entities seeking to become TSA-approved validation firms; (2) personal information so individuals performing, assisting or supervising validation assessments, and security coordinators can undergo STAs; (3) implementation of a standard security program provided by TSA or submission of a proposed modified security program; (4) recordkeeping requirements, including that validation firms maintain assessment reports; and (5) submission of validation reports conducted by validators.

Number of Respondents: 5,663.

Estimated Annual Burden Hours: An estimated 718,481 hours.

Issued in Arlington, Virginia, on January 20, 2011.

Joanna Johnson,

Paperwork Reduction Act Officer, Office of Information Technology.

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Accreditation and Approval of Laboratory Service, Inc., as a Commercial Gauger and Laboratory

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of accreditation and approval of Laboratory Service, Inc., as a commercial gauger and laboratory.

SUMMARY: Notice is hereby given that, pursuant to 19 CFR 151.12 and 19 CFR 151.13, Laboratory Service, Inc., 85 Lafayette St., Carteret, NJ 07008, has been approved to gauge and accredited to test petroleum and petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12 and 19 CFR 151.13. Anyone wishing to employ this entity to conduct laboratory analyses and gauger services should request and receive written assurances from the entity that it is accredited or approved by the U.S. Customs and Border Protection to

conduct the specific test or gauger service requested. Alternatively, inquiries regarding the specific test or gauger service this entity is accredited or approved to perform may be directed to the U.S. Customs and Border Protection by calling (202) 344-1060. The inquiry may also be sent to cbp.labhq@dhs.gov. Please reference the Web site listed below for a complete listing of CBP approved gaugers and accredited laboratories.

http://cbp.gov/xp/cgov/import/operations_support/labs_scientific_svcs/commercial_gaugers/

DATES: The accreditation and approval of Laboratory Service, Inc., as commercial gauger and laboratory became effective on October 12, 2010. The next triennial inspection date will be scheduled for October 2013.

FOR FURTHER INFORMATION CONTACT: Anthony Malana, Laboratories and Scientific Services, U.S. Customs and Border Protection, 1300 Pennsylvania Avenue, NW., Suite 1500N, Washington, DC 20229, 202-344-1060.

Dated: January 19, 2011.

Ira S. Reese,

Executive Director, Laboratories and Scientific Services.
