

CFR 30.36), which requires licensees to decommission their facilities when licensed activities cease. The licensee does not plan to perform any activities with licensed materials at this location. Maintaining the area under a license would reduce options for future use of the property and cause Wittnauer Worldwide to continue leasing a building for which it has no more use.

The Affected Environment and Environmental Impacts

The Wittnauer building is a one story brick building. Work with radioactive materials was done on work benches located within several rooms in the building. Watch parts and finished watches were stored in a safe. The building is located within an industrial park.

The NRC staff has reviewed the surveys performed by Wittnauer Worldwide to demonstrate compliance with the 10 CFR 20.1402 license termination criteria and has performed a confirmatory survey. Based on its review and the results of the confirmatory survey, the staff has determined that the affected environment and environmental impacts associated with the decommissioning of the Wittnauer Worldwide facility are bounded by the impacts evaluated by the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Facilities" (NUREG-1496). The staff also finds that the proposed release for unrestricted use of the Wittnauer Worldwide facility is in compliance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." The NRC has found no other activities in the area that could result in cumulative impacts.

Agencies and Persons Contacted and Sources Used

This Environmental Assessment was prepared entirely by the NRC staff. The U.S. Fish and Wildlife Service was contacted for comment and responded by letter dated October 16, 2002, with no opposition to the action. The Puerto Rico State Historic Preservation Office was also contacted and responded by letter dated March 11, 2003, with no opposition.

Conclusion

Based on its review, the NRC staff has concluded that the proposed action complies with 10 CFR part 20. NRC has prepared this EA in support of the proposed license termination to release the Wittnauer Worldwide facility located at the Rincon Industrial Park,

Road 735, Km. 2.3, in Cayey, Puerto Rico, for unrestricted use. On the basis of the EA, NRC has concluded that the environmental impacts from the proposed action are not expected to be significant and has determined that the preparation of an environmental impact statement for the proposed action is not required.
