Title: Veterans Identity Program Survey, VA Form 10-21037(NR).

OMB Control Number: 2900-NEW.

Type of Review: New collection.

Abstract: The Veteran Identity Program (VIP) survey is intended to remedy shortcomings of existing data and research conducted on minority veterans health care patterns. Previous studies on veterans ethnicity have not been adequately studied due to the sampling methodologies employed, and veteran identity has never been studied due to theoretical shortsightedness. As a result, data on underrepresented veterans groups remains inadequate. Veteran identity is being introduced as a potentially significant predictor of veterans' health care use. The VIP will employ a primary data telephone survey to ensure adequate representation of underrepresented veterans groups. The collected data will be statistically analyzed by VIP researchers to determine how veteran identity and ethnicity predict VA ambulatory care service use by veterans. The results of the analysis will be used to improve minority veterans' access to health care.

Affected Public: Individuals or Households.

Estimated Annual Burden: 960 hours.

Estimated Average Burden Per

Respondent: 18 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 3,200.

Dated: May 18, 2000.

By direction of the Secretary.

Donald L. Neilson,

Director, Information Management Service.
