Abstract: The Office of Special Education Program's Personnel Development Program aims to increase the supply of qualified personnel in the field of special education. The program awards competitive grants to Institutions of Higher Education to support scholars who are preparing to provide special education and related services to children and youth with disabilities. Scholars who receive funding agree to work in the field of special education or related services for two years for each year of support they receive.

The Personnel Development Program Data Collection System collects data from grantees, scholars, and employers who verify that scholars are employed in the field of special education or related services. This data collection serves three program needs. First, data from grantees, scholars, and employers are necessary to assess the performance of the Personnel Development Program on its performance measures. Second, data from all three sources are necessary to determine if scholars comply with the service obligation requirements. Finally,

project-specific performance data are collected from grantees for project monitoring and program improvement.
