

objectives of the Black Sea Bass Fishery Management Plan (FMP). However, further review and consultation may be necessary before a final determination is made to issue the EFP. Therefore, NMFS announces that the Assistant Regional Administrator proposes to recommend that an EFP be issued that would allow three vessels to conduct fishing operations that are otherwise restricted by the regulations governing the fisheries of the Northeastern United States. The EFP would allow for exemptions from the black sea bass minimum fish size requirement so that undersized fish may be retained for data collection purposes. The EFP would allow this exemption for approximately 350 lb (159 kg) of undersized (juvenile) black sea bass (*Centropristis striata*) for the remainder of the 2004 fishing year.

Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed EFPs.

DATES: Comments on this document must be received on or before May 18, 2004.

ADDRESSES: Comments on this notice may be submitted by e-mail. The mailbox address for providing e-mail comments is DA515@noaa.gov. Include in the subject line of the e-mail comment the following document identifier: "Comments on VIMS Black Sea Bass Population Biology EFP Proposal." Written comments should be sent to Patricia A. Kurkul, Regional Administrator, NMFS, Northeast Regional Office, 1 Blackburn Drive, Gloucester, MA 01930. Mark the outside of the envelope "Comments on VIMS Black Sea Bass Population Biology EFP Proposal." Comments may also be sent via facsimile (fax) to (978) 281-9135.

SUPPLEMENTARY INFORMATION: The Virginia Institute of Marine Science (VIMS) submitted an application for an EFP on April 12, 2004, with final revisions received April 21, 2004. This is the second year of a 2-year study. A summary report of the 2003 study was received on April 21, 2004. The experimental fishing application requests authorization to allow the collection of undersized (juvenile) black sea bass for research into the reproductive biology and population dynamics of black sea bass. The VIMS researchers propose to enlist three fishing vessels to retain 25-50 lb (12-23 kg) of undersized black sea bass each month during the participation period

(June 1-December 31, 2004). This would result in a maximum retention of 350 lb (159 kg) of undersized black sea bass for the 2004 fishing year. The collections would take place using handline and fish pot fishing gear during the normal fishing operations of the participating vessels. The collections would take place off the coasts of Virginia and North Carolina in 30-minute squares 11, 12, 15, 16, 19, 20, 25, and 26. The participating vessels would be required to comply with applicable state landing laws and report all landings on the Federal Fishing Vessel Trip Report.
