Abstract of Information Available

A total of 64 cultural items have been requested for repatriation. The 64 unassociated funerary objects are bowls, jars, mugs, ladles, and a fossilized wood arrow point. In 1897, 64 cultural items were removed from the site of Homolovi II in Navajo County, AZ. These items were taken by George A. Dorsey for the Field Museum during an archaeological expedition to Homolovi and were accessioned in 1898. Homolovi II was occupied from 1350 C.E. to 1400 C.E. Based on consultation, academic research, and Museum records, Homolovi II is affiliated with the Hopi Tribe of Arizona and the Zuni Tribe of the Zuni Reservation, New Mexico. There is no known presence of any potentially hazardous substances.

Determinations

The Field Museum has determined that:

- The 64 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural items described in this notice and the Hopi Tribe of Arizona and the Zuni Tribe of the Zuni Reservation, New Mexico.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on

or after May 19, 2025. If competing requests for repatriation are received, the Field Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The Field Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Abstract of Information Available

Human remains representing at least 11 individuals have been identified. The 157 associated funerary objects are 22 lots of groundstone, 20 lots of lithics, 49 lots of ceramic sherds, 11 lots of "historic artifacts," two lots of lightning stones, eight lots of unmodified stone, six lots of ceramic vessels, five lots of ornamental objects, five lots of pipes, three lots of minerals, one lot of "shatter," four lots of botanical objects, 11 lots of fauna, one lot of a figurine, one lot of unworked wood, one lot of a ceramic disc, two lots of architectural remains, one lot of fossils, two lots of cloud blowers, and two lots of "indeterminate." The Museum of New Mexico (MNM) conducted an archaeological salvage excavation at Nambe Pueblo (LA17) from June 16 to July 8, 1966. Ceramics located at the site reveal an occupation no earlier than A.D. 1200 and suggest a continued occupation of the site into the Historic Period. Additional human remains were donated to the Museum by a private individual who collected the human remains in 1964 from Powakwaiounge Ruin, across from the creek from Nambe Pueblo.

Archaeological reports and oral history both confirm that this site and LA 17 are culturally affiliated with the Nambe Pueblo. There are no known chemical treatments for the objects, minus the possible application of some labeling material that is a thermoplastic resin.
