including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques, or other forms of information technology (e.g., permitting electronic submissions of responses).

Agency: Institute of Museum and Library Services.

Title: Proposed Needs Assessment Study: Measures that Matter—Assessing Public Libraries' Activities Related to Workforce Development.

OMB Number: 3137–TBD. *Frequency:* Once.

Affected Public: Public library staff at local and state levels, public officials and service providers involved with workforce development efforts at the libraries, and residents participating in the libraries' workforce development activities.

Number of Libraries in Sample: 10–15.

Estimated Number of Respondents: 600–900.

Estimated Average Burden per Response: TBD.

Estimated Total Annual Burden: TBD. Total Annualized Capital/Startup Costs: N/A.

Total Annual Costs: TBD.

Public Comments Invited: Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

Dated: August 17, 2020.

Kim Miller,

Senior Grants Management Specialist, Institute of Museum and Library Services. [FR Doc. 2020–18302 Filed 8–19–20; 8:45 am]

BILLING CODE 7036-01-P

NATIONAL SCIENCE FOUNDATION

Notice of Permit Applications Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation. **ACTION:** Notice of Permit Applications Received.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act in the Code of Federal Regulations. This is the

required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by September 21, 2020. This application may be inspected by interested parties at the Permit Office, address below.

ADDRESSES: Comments should be addressed to Permit Office, Office of Polar Programs, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, Virginia 22314.

FOR FURTHER INFORMATION CONTACT:

Nature McGinn, ACA Permit Officer, at the above address, 703–292–8030, or *ACApermits@nsf.gov*.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Pub. L. 95–541, 45 CFR 670), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas a requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

Permit Application: 2021–004

1. Applicant: Grant Ballard, Point Blue Conservation Science, 3820 Cypress Dr. #11, Petaluma, CA 94954.

Activity for Which Permit Is Requested: Take, Harmful Interference, Enter Antarctic Specially Protected Areas (ASPAs), Import into USA. The applicant proposed to enter ASPA 121, Cape Royds, ASPA 124, Cape Crozier, and ASPA 105, Beaufort Island, to conduct research on the role of environmental factors on foraging, diet, growth, and survival of Adelie penguins. Research activities would include installing weighbridges, resighting banded birds, and following birds through incubation and chickrearing until late January. The applicant and agents would attach logging and tracking devices on breeding adults and collect fecal samples from adults and chicks during the brooding and guarding stage, then would attach longterm GPS-Argos tags and geolocating dive recorders on adult penguins. The applicant and agents would measure and band 200 chicks at Cape Royds and 500 chicks at Cape Crozier each season, and would deploy GPS-Argos tags on molted juveniles. The applicant and agents would also conduct similar

research at Cape Bird, but the work would be conducted outside the ASPA boundary. To survey the large colonies at Cape Royds and Cape Crozier in a timely manner, the applicant and agents would employ multiple, self- and collectively-aware remotely piloted aircraft (RPAS) simultaneously. The RPAS will be piloted by trained, experienced, and certified operators and the operations will also involve additional visual observation of penguin behavior. For the surveys, the RPAS launch site would be at least 20 meters away from nesting birds and the RPAS would be operated at 50 meters above ground level and nest birds to help ensure minimal disturbance. Surveys at Cape Crozier have the potential to disturb south polar skuas nesting near the penguin colony. Images obtained from the surveys would be used to estimate the number of nesting adults and chicks, as well as nesting density. The applicant and agents would access the general areas by helicopter and would enter the ASPAs on foot. The applicant would maintain a webcam (PenguinCam) positioned slightly inside the Cape Royds ASPA boundary.

Location: ASPA 121, Cape Royds, Ross Island; ASPA 124, Cape Crozier, Ross Island; ASPA 105, Beaufort Island; Cape Bird (outside ASPA boundary).

Dates of Permitted Activities: October 15, 2020–February 15, 2025.

Erika N. Davis,

Program Specialist, Office of Polar Programs. [FR Doc. 2020–18227 Filed 8–19–20; 8:45 am] BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Membership of National Science Foundation's Senior Executive Service Performance Review Board

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation is announcing the members of the Senior Executive Service Performance Review Board.

ADDRESSES: Comments should be addressed to Branch Chief, Executive Services, Division of Human Resource Management, National Science Foundation, Room W15219, 2415 Eisenhower Avenue, Alexandria, VA 22314.

FOR FURTHER INFORMATION CONTACT: Ms. Jennifer Munz at the above address or (703) 292–2478.

SUPPLEMENTARY INFORMATION: The membership of the National Science
