

Objective 1: Ecosystem-Based Management: Adopt ecosystem-based management as a foundational principle for the comprehensive management of the ocean, our coasts, and the Great Lakes;

Objective 2: Coastal and Marine Spatial Planning: Implement comprehensive, integrated, ecosystem-based coastal and marine spatial planning and management in the United States;

Objective 3: Inform Decisions and Improve Understanding: Increase knowledge to continually inform and improve management and policy decisions and the capacity to respond to change and challenges. Better educate the public through formal and informal programs about the ocean, our coasts, and the Great Lakes;

Objective 4: Coordinate and Support: Better coordinate and support Federal, State, Tribal, local, and regional management of the ocean, our coasts, and the Great Lakes. Improve coordination and integration across the Federal Government and, as appropriate, engage with the international community;

Objective 5: Resiliency and Adaptation to Climate Change and Ocean Acidification: Strengthen resiliency of coastal communities and marine and Great Lakes environments and their abilities to adapt to climate change impacts and ocean acidification;

Objective 6: Regional Ecosystem Protection and Restoration: Establish and implement an integrated ecosystem protection and restoration strategy that is science-based and aligns conservation and restoration goals at the Federal, State, Tribal, local, and regional levels;

Objective 7: Water Quality and Sustainable Practices on Land: Enhance water quality in the ocean, along our coasts, and in the Great Lakes by promoting and implementing sustainable practices on land;

Objective 8: Changing Conditions in the Arctic: Address environmental stewardship needs in the Arctic Ocean and adjacent coastal areas in the face of climate-induced and other environmental changes; and

Objective 9: Ocean, Coastal, and Great Lakes Observations, Mapping, and Infrastructure: Strengthen and integrate Federal and non-Federal ocean observing systems, sensors, data collection platforms, data management, and mapping capabilities into a national system and integrate that system into international observation efforts.

These priority objectives are meant to provide a bridge between the National Ocean Policy and action on the ground and in the water, but they do not

prescribe specific actions or responsibilities. The NOC is responsible for developing strategic action plans to achieve the priority objectives. As envisioned, the plans will:

- Identify specific and measurable near-term, mid-term, and long-term actions, with appropriate milestones, performance measures, and outcomes to fulfill each objective;

- Consider smaller-scale, incremental, and opportunistic efforts that could build upon existing activities, as well as more complex, larger-scale actions that have the potential to be truly transformative;

- Identify key lead and participating agencies;

- Identify gaps and needs in science and technology; and

- Identify potential resource requirements and efficiencies; and steps for integrating or coordinating current and out-year budgets.

The plans will be adaptive to allow for modification and addition of new actions based on new information or changing conditions. Their effective implementation will also require clear and easily understood requirements and regulations, where appropriate, that include enforcement as a critical component. Implementation of the National Ocean Policy for the stewardship of the ocean, our coasts, and the Great Lakes will recognize that different legal regimes, with their associated freedoms, rights, and duties, apply in different maritime zones. The plans will be implemented in a manner consistent with applicable international conventions and agreements and with customary international law as reflected in the Law of the Sea Convention. The plans and their implementation will be assessed and reviewed annually by the NOC and modified as needed based on the success or failure of the agreed upon actions.

The NOC is committed to transparency in developing strategic action plans and implementing the National Ocean Policy. As the NOC develops and revises the plans, it will ensure substantial opportunity for public participation. The NOC will also actively engage interested parties, including, as appropriate, State, Tribal, and local authorities, regional governance structures, academic institutions, nongovernmental organizations, recreational interests, and private enterprise.

Public comments are requested on or before July 1, 2011.
