Abstract: Reclamation is responsible for approximately 6.5 million acres of land which directly support Reclamation's Federal water projects in the 17 Western States. We review applications to determine whether granting individual use authorizations are compatible with Reclamation's present or future uses of the lands, facilities, or waterbodies. When we find a proposed use compatible, we advise the applicant of the estimated administrative costs and estimated application processing time. In addition to the administrative costs, we require the applicant to pay a use fee based on a valuation or by competitive bidding. If the application is for construction of a bridge, building, or other significant construction project, Reclamation may require that all plans and specifications be signed and sealed by a licensed professional engineer.
