SUPPLEMENTARY INFORMATION:

Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management, and related activities.

Purpose of the Consent Order Committee (COC): It is the mission of the COC to review the Consent Order, evaluate its strengths and weaknesses, and make recommendation as to how to improve the Consent Order. It is also within the mission of this committee to review and ensure implementation of NNMCAB Recommendation 2019-02, Improving the Utility of the Consent Order with Supplementary Information. The COC will work with the NNMCAB Risk Evaluation and Management Committee to review the risk-based approaches used to determine the prioritization of cleanup actions, as well as the "relative risk ranking" of the campaigns, targets, and milestones by the NNMCAB, to be recommended for use by the DOE EM Los Alamos Field Office (EM-LA) both within and outside of those activities covered by the Consent Order.

Purpose of the Risk Evaluation and Management Committee (REMC): The REMC provides external citizen-based oversight and recommendations to the DOE EM–LA on human and ecological health risk resulting from historical, current, and future hazardous and radioactive legacy waste operations at Los Alamos National Laboratory (LANL). The REMC will, to the extent feasible, stay informed of DOE EM-LA

and LANL's environmental restoration and long-term environmental stewardship programs and plans. The REMC will also work with the NNMCAB COC to provide DOE EM-LA and LANL with the public's desires in determining cleanup priorities. The REMC will prepare recommendations that represent to the best of committee's knowledge and ability to determine, the public's position on human and ecological health risk issues pertaining to direct radiation or contaminant exposure to soils, air, surface and groundwater quality, or the agricultural and ecological environment.
