SUPPLEMENTARY INFORMATION: Federal Mine Safety and Health Act of 1977 section 103(h), 30 U.S.C. 813, authorizes the MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Underground mines usually present harsh and hostile working environments. Pursuant to the statutory authority, the MSHA has issued regulations under which a mine operator is required to prepare a written plan of the mine ventilation system. The plan is required to be updated at least annually. Upon written request of the MSHA District Manager, the plan or revisions must be submitted to the MSHA for review and comment. In addition, the main ventilation fans for an underground mine must be maintained either according to manufacturers' recommendations or a written periodic schedule. Upon request of an authorized representative of the Secretary of Labor, this fan maintenance schedule must be made available for review. The records assure compliance with the standard and may serve as a warning mechanism for possible ventilation problems before they occur.
