Comment: On May 11, 2011 we published in the **Federal Register** (76 FR 27369) a 60-day notice of our intent to request reinstatement of this information collection authority from OMB. In that notice, we solicited public comments for 60 days ending July 11, 2011. One comment was received from the public notice. The comment came from Jean Public via e-mail on May 12, 2011. Ms. Public objected to the information collection and suggested less frequent collection.

Response: We responded to Ms. Public on May 26, 2011 describing the program, the survey frequency and the cost issues raised by Ms. Public. NSF believes that because the comment does not pertain to the collection of information on the required forms for which NSF is seeking OMB approval NSF is proceeding with the clearance request.

Need and Use of the Information: The Federal government, universities, researchers, and others use the information extensively. The National Science Foundation and the National Institutes of Health, publishes statistics from the survey in several reports, but primarily in the annual report series, "Survey of Graduate Students and Postdoctorates in Science and Engineering", and the congressionally mandated biennial publication series, "Science and Engineering Indicators" and "Women, Minorities and Persons with Disabilities in Science and Engineering".

Description of Respondents: Individuals.

Number of Respondents: 15,395.

Frequency of Responses: Annually.

Total Burden Hours: 40,201.

Dated: July 19, 2011.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

NUCLEAR REGULATORY COMMISSION

[NRC-2009-0262]

Guidance for Fuel Cycle Facility Change Processes

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; extension of comment period.

SUMMARY: On July 14, 2011 (76 FR 41527), the U.S. Nuclear Regulatory Commission (NRC or Commission) re-issued Draft Regulatory Guide, DG-3037, "Guidance for Fuel Cycle Facility Change Processes" in the **Federal Register** for a 30 day public comment period. The NRC is extending the public comment period for DG-3037 from August 12, 2011 to September 16, 2011.

DG-3037 describes the types of changes for fuel cycle facilities for which licensees are to seek prior approval from the NRC. The guidance discusses how licensees can evaluate potential changes to determine whether NRC approval is required before implementing a change. This regulatory guide also describes the level of information that the staff of the NRC considers acceptable for use in documenting and reporting changes made without prior NRC approval.

DATES: Submit comments by September 16, 2011. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: Please include Docket ID NRC-2009-0262 in the subject line of your comments. Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site, <http://www.regulations.gov>. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in

SUPPLEMENTARY INFORMATION: On July 14, 2011 (76 FR 41527), the NRC published a notice of issuance and availability of Draft Regulatory Guide DG-3037, "Guidance for Fuel Cycle Facility Change Processes." By e-mail

dated July 7, 2011, the Nuclear Energy Institute (ADAMS Accession No. ML111930008) requested an extension of the stated comment period for the purpose of providing sufficient review while attending planned public meetings related to the subject matter of the proposed guide. It is the desire of the NRC to receive comments of a high quality from all stakeholders. Several factors have been considered in granting an extension. The requested comment period extension is reasonable and does not affect NRC deadlines. The additional time will allow stakeholders to discuss the proposed guide during related meetings. Therefore the comment submittal period is extended from the original date of August 12, 2011 to September 16, 2011.

Dated at Rockville, Maryland, this 13th day of July 2011.

For the Nuclear Regulatory Commission.

*Chief, Regulatory Guide Development Branch,
Division of Engineering, Office of Nuclear
Regulatory Research.*
