SUPPLEMENTARY INFORMATION:**I. Abstract**

Collection of estuary habitat restoration project information (e.g., location, habitat type, goals, status, monitoring information) is in process in order to continue to populate a restoration project database mandated by the Estuary Restoration Act (ERA) of 2000. The National Estuaries Restoration Inventory (NERI) contains information for estuary habitat restoration projects funded through the ERA as well as non-ERA project data that meet quality control requirements and data standards established under the Act. The database provides information to improve restoration methods, provides the basis for required reports to Congress, and tracks estuary habitat acreage restored. It is accessible to the public via the Internet for data queries and project reports. Recipients of ERA funds are required to submit specific information on habitat restoration projects into the NERI database through an interactive Web site available over the Internet (<https://neri.noaa.gov/>). The projects that are not funded through the ERA can be

voluntarily entered into the database by project managers. Other Federal agencies and private grant programs may also require recipients to enter project information in the NERI database.

II. Method of Collection

Project managers will electronically submit estuary restoration project information via NOAA's National Estuaries Restoration Inventory (NERI) Web site. The Web site contains a user-friendly data entry interface for project managers to enter and submit project information to the NERI database. To facilitate the collection of information through the data entry interface, NOAA's National Marine Fisheries Service (NMFS) provides worksheets containing database fields that can be downloaded and printed from the Web site. These worksheets can be used by project managers to guide information collection, and can then serve as a reference as project managers enter project information through the Web site. The reporting forms are also available in paper format to be sent to project managers as necessary.
