

of ROWs for construction, operation, maintenance and termination of a 230-kV transmission line, tensioning sites and related access across lands administered by the BLM. The route for the Selected Alternative would originate at the Echanis Wind Energy Project substation, south of Diamond, Oregon and connect to Harney Electric Cooperative's existing 115-kV transmission line near Crane, Oregon. The Selected Alternative would not cross the Malheur National Wildlife Refuge administered by the U.S. Fish and Wildlife Service. This alternative will enable the construction of the Echanis Wind Energy Project on private land. The effects of the wind project on private land are analyzed in the Final Environmental Impact Statement (EIS) because they are "connected actions" under the National Environmental Policy Act of 1969.

This BLM-preferred Alternative was evaluated in the Final EIS. The Notice of Availability of the Final EIS for the North Steens 230kV Transmission Line Project was published in the **Federal Register** on October 21, 2011 (76 FR 65509).

Because this decision is approved by the Secretary of the Interior, it is not subject to administrative appeal (43 CFR 4.410(a)(3)).

Authority: 40 CFR 1506.6.

Mike Pool,
Deputy Director, Bureau of Land Management.
