SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The purpose of this information collection is to identify the infrastructure needs of public water systems for the 20-year period from January 2020 through December 2039. EPA's Office of Ground Water and Drinking Water will collect these data to comply with Sections 1452(h) and 1452(i)(4) of the Safe Drinking Water Act (42 U.S.C. 300j-12). The Agency will use a questionnaire to collect capital investment need information from selected community water systems and not-for-profit non-community water systems. Participation in the survey is voluntary. The data from the questionnaires will provide EPA with new information from the field to assist in the 2020 update to the Agency's assessment of the nationwide infrastructure needs of public water systems. Also, as mandated by section 1452(a)(1)(D)(ii) of the Safe Drinking Water Act, EPA uses the results of the latest survey to allocate Drinking Water State Revolving Fund (DWSRF) monies to the states. Under the allotment

formula, each state receives a grant of the annual DWSRF appropriation in proportion to the state's share of the total national need, with the proviso that each state receives at least one percent of the total funds available.

Form numbers: 6100-03.

Respondents/affected entities:

Community water systems not-for-profit non-community water systems, and state agencies.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 3,912 (total).

Frequency of response: One time.

Total estimated burden: 15,177 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$1,705,941 (per year), includes \$0 annualized capital or operation and maintenance costs.

Changes in estimates: This is a new ICR. The estimated total public reporting burden over the entire four-year length of the 2020 DWINSAs is over 8,000 hours higher compared with the ICR approved by OMB for the 2015 DWINSAs survey (OMB control number 2040-0274). This burden increase is almost entirely a result of the 2020 Survey being the first effort to collect information on lead service line inventories for all system types across all states and territories as well as tribal water systems.

Director, Regulatory Support Division.
