

specific requests, non-specific hierarchical requests, report generation and customized production of machine-readable products.

6. Provides guidance and direction in developing copy statements, subschema definitions, and reports describing the characteristics of the software and data that support SSA's mission.

7. Directs the establishment of automated documentation products and analytical products to support software engineering and data base integration.

8. Provides support and direction for the automated interface between the DRMS and other system management systems such as EDPOCS, VALUE, ASM-2, etc.

9. Provides direction in identifying techniques and tools that support data resource management as well as evaluating new data resource technology to the SSA environment.

10. Responsible for devising, promoting, ensuring and enforcing appropriate security measures for the facility, operational activity, or both, for the defined areas of management and/or supervisory responsibility.

G. The Electronic Processing Staff (S4NE).

1. Serves as the agency focal point for technologies related to document imaging, electronic document management and electronic workflow processes.

2. Directs the definition of data and image management to facilitate workflow processing and re-engineering of processes to support data management based upon performance characteristics and capabilities required in the SSA environment.

3. Directs the development and evaluation of implementation alternatives for each data base, data image and workflow process and its integration with other projects.

4. Provides guidance and direction in the selection of the appropriate commercial software packages and developmental software to satisfy data base, data image and workflow requirements.

5. Directs the design, development, acquisition, validation, and implementation of data image and workflow management systems and data support software.

6. Directs the design and development of new or modified software for document imaging and workflow processing and directs the selection and implementation of commercial packages for this purpose.

7. Directs the establishment of systems and procedures for protecting and monitoring data integrity including the establishment of data backup and

recovery methods, data access controls and audit trails.

8. Provides direction in the design, development and implementation of applications support software to facilitate interaction between document imaging and workflow processing and applications software.

9. Directs the establishment and maintenance of support software providing document imaging and workflow processing so that the evolution to new architectures is not disruptive to SSA's applications software.

10. Directs the design and development of software and/or identifies commercial software that handles computer output to laser disc (COLD) applications.

11. Devises, promotes, ensures and enforces appropriate security measures for the facility, operational activity, or both, for the defined areas of management and/or supervisory responsibility.

TENNESSEE VALLEY AUTHORITY

Supplemental Environmental Impact Statement: Bellefonte Conversion Project

AGENCY: Tennessee Valley Authority.

ACTION: Notice of intent.

SUMMARY: The Tennessee Valley Authority (TVA) will prepare a supplemental environmental impact statement (SEIS) for the construction and operation of an integrated gasification combined cycle (IGCC) power plant by partially converting the Bellefonte Nuclear Plant (BLN) site in Jackson County, Alabama. The primary fuels for the proposed IGCC plant would be coal and petroleum coke. The plant would supply baseload capacity to the TVA electrical generation system to meet growing power demands. The SEIS will supplement the final environmental impact statement (FEIS) that TVA completed in 1997 on options for converting the Bellefonte facility to a fossil-fueled power plant. One of the options considered in the 1997 FEIS was an IGCC plant. The current proposed action differs from the 1997 proposed action in the extent to which the unfinished BLN would be converted to a fossil-based facility. The 1997 proposed action was for the full conversion of BLN, while the current proposed action would result in the partial conversion of BLN. Public comment is invited concerning both the scope of the SEIS and environmental issues that should be addressed in the SEIS.

DATES: Comments on the scope of the SEIS must be postmarked or e-mailed no
