

the collection of dates of events and spells of coverage. The EHC is a tool to assist the respondent's ability to recall events accurately to the beginning of the reference period and provide increased data quality and inter-topic consistency for dates reported by respondents. The EHC is intended to help respondents recall information in a more natural "autobiographical" manner by using events from one topic as triggers to recall additional details and the timing in other topics.

SIPP is seeking clearance to make the following changes:

- Revised questionnaire content—The 2024 SIPP questionnaire removes some latent COVID–19 pandemic content that are no longer relevant. The questionnaire also updates some questions for better clarity and to reduce respondent burden. SIPP is also updating the retirement lump-sum content and medical- and jointly-held-debts section based on cognitive testing. The final set of proposed new and modified content will be included in the full OMB ICR for the 2024 SIPP.

- Reduction in Sample—The SIPP overlapping panels began with the 2018 SIPP. From 2018 through 2022, SIPP sent a list of approximately 53,000 designated housing units to be interviewed in the field each year, including new panel sample cases. Starting in 2023, SIPP reduced that number from 53,000 to approximately 35,000 housing units in the annual sample. The new 2024 panel size is 35,000 housing units minus the total of eligible housing units from earlier panels.

## II. Method of Collection

The SIPP uses the Computer-Assisted Personal Interviewing (CAPI) method of data collection. The household interview collects one interview per person per year. Each interview will reference a period that begins with the beginning of the reference period and extends to the interview month of the current year. A field representative will conduct the interview in person with all household members 15 years old or over, using regular proxy-respondent rules. Children under 15 years old have information collected by proxy interviews with the household respondent. In the instances where the residence is not accessible or the respondent makes a request, the field representative will conduct the interview by telephone.
