Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills (Renewal)" (EPA ICR Number 1805.11, OMB Control Number 2060–0377), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through December 31, 2021. Public comments were previously requested, via the **Federal Register**, on February 8, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public.

An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before January 26, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA HQ-OAR-2020-0624, online using www.regulations.gov (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills apply to new and existing chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills, for which the

chemical recovery combustion sources emit greater than or equal to 10 tons per year (tpy) of any one hazardous air pollutant (HAP) or greater than or equal to 25 tpy of any combination of HAPs. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of any failures to meet applicable standards, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to 40 CFR part 63, subpart MM.

Form Numbers: 5900-520.

Respondents/affected entities:

Chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart MM).

Estimated number of respondents: 104 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 117,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$14,700,000 (per year), which includes \$788,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. This ICR includes a more accurate estimate of the number of existing facilities based on review of EPA's Enforcement and Compliance History Online (ECHO) and Greenhouse Gas Reporting Program (GHGRP) databases and consultations with the Agency's internal industry experts, and revises the previous number of 107 respondents down to 104. All 3 of the facilities removed are classified as Kraft Mills. The number of existing sources is adjusted downward to 254 and the number of ESPs is revised down to 178. This ICR also adjusts the growth rate from the previous ICR to remove the burden for a new source that was constructed in 2021, and removes burden from one-time initial compliance activities following the 2017 final rule (adjusting existing data acquisition systems to reflect the changes from the final rule). Therefore, the change in burden from the most-recently approved ICR, as currently identified in the OMB Inventory of Approved Burdens, is attributed to the

alteration in total respondents, and because these standards have been in effect for more than three years. This ICR, by in large, reflects the on-going burden and costs for existing facilities. The decrease in the capital/startup cost is solely attributed to the decrease in total respondents. Since there are no significant changes in the regulatory requirements, the operation and maintenance (O&M) costs remain unaffected.

Director, Regulatory Support Division.

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), notice is given of a proposed consent decree in *Center for Biological Diversity, et al. v. Regan*, No. 4:21-cv-06166-JST. On August 11, 2021, Plaintiffs Center for Biological Diversity, Center for Environmental Health, and Sierra Club (collectively "Plaintiffs") filed a complaint in the United States District Court for the Northern District of California. Plaintiffs alleged that the Environmental Protection Agency (EPA or the Agency) failed to perform certain non-discretionary duties in accordance with the Act to promulgate final actions for two nonattainment areas under the 2010 1-hour primary sulfur dioxide (SO₂) national ambient air quality standard (NAAQS): A final federal implementation plan (FIP) for the Detroit, Michigan SO₂ nonattainment area, and approval or disapproval of the state implementation plan (SIP) for the Baltimore and Anne Arundel Counties, Maryland SO₂ nonattainment area. The proposed consent decree would establish deadlines for EPA to take these actions.

DATES: Written comments on the proposed consent decree must be received by *January 26, 2022*.
