Total Estimated Cost: The total annual cost to all Respondent Partners is \$628,477. The total annual cost to federal agency respondents is \$160,292.

Changes in estimates: There is an increase of 3,203 hours in the total estimated Respondent Partner burden compared with the ICR currently approved by OMB. This increase reflects the following adjustments and program changes:

(1) Adjustments associated with increased interest in SmartWay, and thus, an increase in new annual Respondents and applications for the SmartWay Excellence Award, as well as robust Program retention practices, leading to increased number of Respondent partners reporting annually;

(2) Increased burden associated with the SmartWay Tractor & Trailer program; and,

(3) Reduced burden due to EPA's streamlined Partnership Annual Agreement process.

Abstract: The affected entities are subject to the General Provisions of the NESHP at 40 CFR part 61, subpart A, and to the provisions at 40 CFR part 61, subparts L and Y. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance

tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required quarterly or semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of benzene storage vessels and coke by-product recovery plants.

Respondent's obligation to respond:

Mandatory (40 CFR part 61, subparts L and Y).

Estimated number of respondents: 21 (total).

Frequency of response: Semiannually and occasionally.

Total estimated burden: 3,193 hours (per year). "Burden" is defined at 5 CFR 1320.3(b).

Total estimated cost: \$312,347 (per year), which also includes no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in burden from the most-recently approved ICR. This increase is not due to any program changes; it is the result of adding the labor burden associated with subpart Y. The most-recently approved ICR only reflected the burden associated with subpart L, while this ICR reflects the total burden associated with subparts L and Y.

For subpart L, note that the labor burden between this ICR and the most-recently approved ICR is virtually identical (there is a one-hour increase, but it is due to differences in rounding). There is an increase in Respondent and Agency burden costs, however. This increase is due to the use of updated labor rates. This ICR references labor rates from the Bureau of Labor Statistics to calculate respondent burden costs and references labor rates from OPM to calculate Agency burden costs.

Director, Collection Strategies Division.
