SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is the preeminent collector and provider of timely, relevant and quality data about the

people and economy of the United States. Economic data are the Census Bureau's primary program commitment during non-decennial census years. The economic census, conducted under authority of Title 13, United States Code, is the primary source of facts about the structure and functioning of the Nation's economy and features unique industry and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business and the general public. The 2012 Economic Census covering the Mining Sector (as defined by the North American Industry Classification System (NAICS)) will measure the economic activity of almost 26,000 mineral establishments.

The information collected from establishments in this sector of the economic census will produce basic statistics for a number of establishments, shipments, payroll, employment, detailed supplies and fuels consumed, depreciable assets, inventories, and capital expenditures. It also will yield a variety of subject statistics, including shipments by product line, type of operation, size of establishments and other industry-specific measures.

Primary strategies for reducing burden in Census Bureau economic data collections are to increase electronic reporting through broader use of computerized self-administered census questionnaires, on-line questionnaires and other electronic data collection.

II. Method of Collection

Establishments included in this collection will be selected from a frame given by the Census Bureau's Business Register. To be eligible for selection, an establishment will be required to satisfy the following conditions: (i) It must be classified in the mining sector; (ii) it must be an active operating establishment of a multi-establishment firm (including operations under exploration and development), or it must be a single-establishment firm with payroll; and (iii) it must be located in one of the 50 states, offshore areas, or the District of Columbia. Mail selection procedures will distinguish the following groups of establishments:
